

# **Biodegradable Microparticle and In Situ Microparticle Systems**

Inaugural-Dissertation

zur

Erlangung der Doktorwürde

am Fachbereich Biologie, Chemie, Pharmazie

der Freien Universität Berlin

vorgelegt in englischer Sprache

von

**Xiaosong Luan**

Berlin 2005

1. Gutachter: Prof. Dr. R. Bodmeier  
2. Gutachter: Prof. Dr. J. Siepmann

Tag der mündlichen Prüfung: 27.04.2005

**To my wife and my parents**

## Acknowledgements

First of all, I wish to express my gratitude to my supervisor, Prof. Dr. Roland. Bodmeier for his valuable advice, guidance, and encouragement throughout this study. I am very thankful to him for providing me an interesting research topic and the opportunity to work in his international group. Furthermore, I am very grateful for his scientific and financial support and numbers of discussion.

I am extremely grateful to Prof. Dr. Jürgen Siepmann at Université de Lille 2, France, for many valuable advices in the beginning of my dissertation, co-authoring papers, and for his evaluation of this thesis.

I would like to thank Vivian Lopez, Dr. Marc Skupin, Duangrutano Shuwisitkul, Joana Mota, for the friendly atmosphere in the lab, Wenyu Dong for his friendship and the animal study in France, Martin Körber for the valuable discussion. Thanks to Dr. Andrei Dashevsky, Katrin Möbus, Ildiko Terebesi, Dirk Sticha, Diana Klose, and Martin Schulz for proof-readings and constructive suggestions. Special thanks to Oliver Bley for handling computer problems. I am grateful to Angelika Schwarz, Eva Ewest, Andreas Krause, Saowanee Jaraswekin, Christine Curbach, Florence Lecomte, Burkhard Dickenhorst, Frauke Kreye, Ahmad Mohammad, Araya Raiwa, Soravoot Rujvivipat for their kind support.

Thanks to Nachwuchsförderungsgesetz (NaFöG) for the financial support.

I want to thank Prof. Gust, Prof. Löwe, and Dr. Mehnert for serving as members of my thesis advisor committee.

Sincere thanks are extended to my parents, my sister, and all my friends for their love and support through all the years.

Finally I deeply thank my wife, Wei Wang for her never-ending love, enormous support, and continued patience and enthusiasm.

# Content

<b>1. Introduction.....</b>	<b>1</b>
1.1. Parenteral controlled release systems .....	2
1.1.1. Polymeric controlled release systems .....	3
1.1.2. Biodegradable polymers .....	4
1.2. Polyester PLA and PLGA.....	7
1.2.1. Degradation and erosion of the PLGA.....	8
1.2.2. Characterization of polyesters.....	9
1.2.2.1. Molecular weight and polydispersity.....	9
1.2.2.2. Optical activity and crystallinity.....	10
1.2.2.3. Glass transition temperature ( $T_g$ ).....	10
1.2.2.4. Copolymer composition.....	11
1.2.3. Influence of PLGA characters on polymer degradation .....	11
1.3. Biodegradable polymer devices.....	11
1.3.1. Implants.....	11
1.3.2. Microparticles .....	12
1.3.2.1. Phase separation (Coacervation).....	13
1.3.2.2. Spray drying.....	13
1.3.2.3. Solvent evaporation .....	14
1.4. In situ forming devices.....	17
1.4.1. In situ forming implants.....	18
1.4.1.1. Thermoplastic pastes.....	18
1.4.1.2. In situ cross-linked polymer systems.....	19
1.4.1.3. In situ forming cubosomes.....	20
1.4.1.4. Thermally induced gelling systems .....	21
1.4.1.5. pH induced gelling systems .....	22
1.4.1.6. In situ solvent removal systems .....	23
1.4.2. In situ forming microparticles (ISM).....	25
1.4.2.1. Preformed emulsions .....	26
1.4.2.2. Emulsification directly prior to injection.....	26
1.5. Controlled delivery of polypeptides.....	27
1.6. Difficulties in the controlled delivery of polypeptides .....	30

1.6.1.	Protein instability .....	30
1.6.2.	Initial release .....	31
1.6.3.	Tri-phasic release .....	32
1.7.	Leuprolide acetate .....	33
1.8.	Objectives .....	36
<b>2.</b>	<b>Materials and Methods.....</b>	<b>37</b>
2.1.	Materials .....	38
2.2.	Methods.....	40
2.2.1.	Preparation of the formulations .....	40
2.2.1.1.	Microparticles prepared by the cosolvent method .....	40
2.2.1.2.	Film casting.....	41
2.2.1.3.	In situ forming implants.....	41
2.2.1.4.	In situ forming microparticles.....	41
2.2.2.	Determination of encapsulation efficiency of conventional microparticles .....	42
2.2.3.	In vitro release.....	43
2.2.3.1.	Conventional microparticles .....	43
2.2.3.2.	Film .....	43
2.2.3.3.	In situ forming implants.....	44
2.2.3.4.	In situ forming microparticles.....	44
2.2.4.	Particle and droplets size characterization.....	45
2.2.5.	Microparticles morphology characterization .....	45
2.2.6.	Differential Scanning Calorimetry (DSC) .....	46
2.2.7.	Investigation of the emulsion formation in ISM.....	46
2.2.8.	Comparison of diffusion of solvents into the external phase.....	46
2.2.9.	<sup>1</sup> H nuclear magnetic resonance (NMR) .....	47
2.2.10.	Solvent diffusion into the release medium in ISM-systems .....	48
2.2.11.	Viscosity measurements.....	48
2.2.12.	Injectability .....	48
2.2.13.	Influence of the injection techniques on the in situ forming systems.....	48
2.2.14.	In vivo evaluation .....	49
<b>3.</b>	<b>Results and Discussion.....</b>	<b>50</b>
3.1.	Microparticles prepared by the solvent evaporation (cosolvent) method.....	51

3.1.1.	Key parameters affecting the initial release and encapsulation efficiency .....	51
3.1.1.1.	Addition of NaCl to the external phase.....	51
3.1.1.2.	Addition of ethanol to the external phase .....	53
3.1.1.3.	Volume of the external phase .....	58
3.1.1.4.	Solvent evaporation (closed versus open beaker) and stirring time .....	58
3.1.1.5.	Other variables .....	60
3.1.1.6.	Scale-up.....	62
3.1.2.	Modification of the tri-phasic release pattern .....	63
3.1.2.1.	Influence of various formulation and processing parameters .....	63
3.1.2.2.	Influence of PVP on the release pattern.....	65
3.1.2.3.	Influence of medium chain triglycerides (MCT) on the release pattern.....	65
3.2.	In situ forming microparticle (ISM) systems.....	75
3.2.1.	Emulsion formation and morphology of resulting microparticles.....	75
3.2.1.1.	Influence of the polymer solution viscosity.....	75
3.2.1.2.	Influence of the solvent diffusion into the external continuous phase.....	78
3.2.1.3.	Morphology of the in situ forming microparticles.....	83
3.2.2.	In vitro evaluation: influence of the parameters .....	85
3.2.2.1.	ISM-systems prepared with RG 503H.....	85
3.2.2.1.1.	Morphology and in vitro release .....	85
3.2.2.1.2.	Parameters affecting the initial release .....	87
3.2.2.2.	ISM prepared with R 202H.....	94
3.2.2.2.1.	In vitro release and morphology .....	94
3.2.2.2.2.	ISM versus conventional microparticles.....	97
3.2.3.	Reduction of the initial release with cosolvent .....	99
3.2.3.1.	Use of NMP and triacetin in ISM .....	99
3.2.3.2.	Use of NMP and solvents with varying water miscibility in ISM.....	105
3.2.3.3.	In vivo testing of NMP/triacetin-based ISM.....	109
3.2.3.4.	NMP/triacetin in ISM-systems prepared with PLA R 203H .....	110
3.2.4.	Influence of the PLGA type.....	111
3.2.4.1.	Influence of the PLGA molecular weight.....	111
3.2.4.2.	Influence of the polymer endgroup functionality .....	120
3.2.4.3.	Blending poly(D,L-lactide) R 203H with R 202H.....	121

<b>4. Summary.....</b>	<b>123</b>
<b>5. Zusammenfassung .....</b>	<b>127</b>
<b>6. References.....</b>	<b>131</b>
<b>7. Publications and Presentations.....</b>	<b>147</b>
<b>8. Curriculum Vitae.....</b>	<b>150</b>
