Abstract

| | | |
|-----------|---|-----------|
| I | Introduction..... | 1 |
| 1.1 | Visual Signal Transduction..... | 1 |
| 1.1.1 | Rod Cell..... | 1 |
| 1.1.2 | Structure and Function of Rhodopsin..... | 3 |
| 1.1.2.1 | Structure and Function of the Extracellular Surface Domain of Rhodopsin.... | 3 |
| 1.1.2.2 | Structure and Function of the Membrane-Embedded Domain of Rhodopsin.. | 5 |
| 1.1.2.3 | Structure and Function of Cytoplasmic Surface Domain of Rhodopsin..... | 6 |
| 1.1.3 | Signal Transduction in Vertebrate Photoreceptors..... | 6 |
| 1.1.4 | Rhodopsin Photocycle..... | 7 |
| 1.2 | The Structural Basis of Rhodopsin-Transducin Interactions..... | 9 |
| 1.2.1 | Structural Studies of Transducin..... | 9 |
| 1.2.2 | The Mechanism of Rhodopsin-Catalyzed Nucleotide Exchange..... | 10 |
| 1.3 | Assays of Photoreceptor Activity..... | 14 |
| 1.3.1 | UV/Vis Spectra to Study Photoreaction of Rhodopsin..... | 14 |
| 1.3.2.1 | Trp Fluorescence to Study Retinal-Rhodopsin Interaction..... | 15 |
| 1.3.2.2 | Trp Fluorescence to Measure GTP Binding by Transducin..... | 15 |
| 1.3.3 | NIR Light Scattering Due to Transducin-Membrane Binding..... | 15 |
| 1.3.4 | Evanescence Wave Techniques..... | 16 |
| 1.3.4.1 | Resonant Mirror Spectroscopy..... | 16 |
| 1.3.4.2 | Surface Plasmon Resonance (SPR)..... | 17 |
| 1.4 | The Enzymatic Biotinylation of Proteins..... | 19 |
| 1.4.1 | The Biotinylation Reaction..... | 20 |
| 1.4.2 | Uses of Enzymatic Protein Biotinylation..... | 21 |
| 1.5 | Motivation and Goal of The Project..... | 22 |
| II | Materials and Methods..... | 23 |
| 2.1 | Materials..... | 23 |

| | | |
|------------|--|-----------|
| 2.1.1 | Enzymes and Antibodies..... | 23 |
| 2.1.2 | Vectors and Oligos..... | 24 |
| 2.1.3 | Cells and <i>E.coli</i> Strains..... | 24 |
| 2.1.4 | Solution and Buffers..... | 24 |
| 2.1.5 | Equipment..... | 26 |
| 2.2 | Methods..... | 26 |
| 2.2.1 | Expression and Purification of BirA..... | 26 |
| 2.2.1.1 | Expression of GST-BirA Fusion Protein..... | 26 |
| 2.2.1.2 | Purification of BirA and Removal of GST Moiety..... | 27 |
| 2.2.2 | Expression and Purification of MBP-Bio..... | 28 |
| 2.2.2.1 | Construction of Plasmid pMAL-Bio..... | 28 |
| 2.2.2.2 | Amplification and Purification of MBP-Bio..... | 29 |
| 2.2.3 | Expression and Purification of Recombinant Rhodopsin..... | 29 |
| 2.2.3.1 | Plasmids Used for Expression of Recombinant Rhodopsin..... | 29 |
| 2.2.3.2 | Expression and Preparation of Recombinant Rhodopsin..... | 31 |
| 2.2.4. | Preparation of Transducin..... | 32 |
| 2.2.5. | Biotinylation of Recombinant Proteins..... | 32 |
| 2.2.6. | SDS-PAGE and Western Blot Analysis..... | 33 |
| 2.2.7. | Quantitation of Biotinylated Rhodopsin..... | 33 |
| 2.2.8 | Purification of Biotinylated Proteins..... | 34 |
| 2.2.9 | Assays by UV-visible Spectroscopy..... | 34 |
| 2.2.10 | Fluorescence Spectroscopy..... | 35 |
| 2.2.11 | The IAsys Technology..... | 35 |
| III | Results..... | 41 |
| 3.1 | Optimization of Biotinylation Reaction..... | 41 |
| 3.1.1 | Expression and Purification of BirA..... | 41 |
| 3.1.1.1 | Construction of Plasmid for BirA..... | 41 |
| 3.1.1.2 | Expression and Purification of BirA..... | 41 |
| 3.1.2 | Expression and Purification of Biotinylated Maltose Binding Protein..... | 43 |

| | | |
|---------|---|----|
| 3.1.2.1 | Construction of Plasmid for Biotinylated Maltose Binding Protein..... | 43 |
| 3.1.2.2 | Expression, Biotinylation and Purification of MBP-Bio..... | 44 |
| 3.1.3 | Optimization of Biotinylation Reaction Conditions..... | 45 |
| 3.2 | Biotinylation of Recombinant Rhodopsin..... | 46 |
| 3.2.1 | Recombinant Rhodopsin with Biotinylation Sequences..... | 46 |
| 3.2.2 | Construction of Plasmid for Rho-Bio..... | 47 |
| 3.2.3 | Expression, Purification and Biotinylation of Rho-Bio..... | 47 |
| 3.3 | Quantification of Biotinylation..... | 50 |
| 3.3.1 | Evaluation by Western Blotting | 50 |
| 3.3.2 | Quantitation of Biotinylation..... | 51 |
| 3.4 | Characterization of Rhodopsin-Bio Mutants..... | 53 |
| 3.4.1 | UV/Visible Absorption Spectroscopy..... | 53 |
| 3.4.2 | Activation Determined with Fluorescence Assay..... | 53 |
| 3.4.3 | Interaction between Rhodopsin and Transducin..... | 55 |
| 3.5 | Interaction between Gt and Rho-Bio Monitored by the IAsys system..... | 57 |
| 3.5.1 | Immobilization of Biotinylated Rhodopsin..... | 58 |
| 3.5.1.1 | Monolayer of NeutrAvidin Linker..... | 58 |
| 3.5.1.2 | Immobilization of Biotinylated Rhodopsin..... | 59 |
| 3.5.2 | Formation of Supported Lipid Bilayer..... | 60 |
| 3.5.3 | Detection of Immobilized Rhodopsin by Antibody..... | 60 |
| 3.5.4 | Rhodopsin-G protein Interaction..... | 61 |
| 3.5.4.1 | Transducin Activation Reaction Scheme..... | 61 |
| 3.5.4.2 | Binding of Transducin to the SLB..... | 62 |
| 3.5.4.3 | Sensorgram of Typical Experiment..... | 63 |
| 3.5.5 | Activation of Rhodopsin..... | 65 |
| 3.5.5.1 | Formation of R*·Gt Complex..... | 65 |
| 3.5.5.2 | Rhodopsin Triggered Desorption of Transducin..... | 65 |
| 3.5.5.3 | Decay of Rhodopsin Activity..... | 67 |
| 3.5.6 | Rhodopsin-Chromophore Interaction..... | 69 |
| 3.5.6.1 | The Rhodopsin Cycle..... | 69 |

| | | |
|-------------|---|-----------|
| 3.5.6.2 | Regeneration of Rhodopsin from Opsin..... | 70 |
| 3.5.6.3 | Binding of Chromophore to Opsin..... | 72 |
| 3.5.6.4 | Stability of Immobilized Opsin..... | 72 |
| IV | Discussion..... | 75 |
| V | Abbreviation..... | 83 |
| VI | References..... | 85 |
| VII | Acknowledgement | |
| VIII | CV | |
