

**AN EASILY ACCESSIBLE TOOLBOX OF FUNCTIONALIZED
MACROCYCLES AND ROTAXANES,
A (TANDEM) ESI-FTICR MASS SPECTROMETRIC STUDY ON
FRÉCHET-TYPE DENDRIMERS WITH AMMONIUM CORES
AND
HIERARCHICAL SELF-ASSEMBLY OF METALLO-
SUPRAMOLECULAR NANO-SPHERES**

**Inaugural-Dissertation
to obtain the academic degree
Doctor rerum naturalium (Dr. rer. nat.)**

**submitted to the Department of Biology, Chemistry and Pharmacy
of Freie Universität Berlin**

by

BILGE BAYTEKIN

from Ankara

August, 2008

The preparative work presented in this thesis was accomplished in a period between November 2003 and July 2008 in Kekulé Institute of Organic Chemistry and Biochemistry of Rheinische Friedrich-Wilhelms Universität Bonn and Institute of Chemistry and Biochemistry of Freie Universität Berlin under supervision of Prof. Dr. Christoph Schalley.

1st Reviewer: Prof. Dr. Christoph A. Schalley

2nd Reviewer: Prof. Dr. Rainer Haag

Date of defence: 05.11.2008

For my beloved Tarik,

whom I always like to learn from and with...

Index

I.	AN EASILY ACCESSIBLE TOOLBOX OF FUNCTIONALIZED MACROCYCLES AND ROTAXANES.....	1
1.	Purpose of Study.....	1
2.	Introduction.....	4
2.1.	Macrocycles, catenanes and rotaxanes: Functional supramolecular elements for molecular machines.....	4
2.2.	Macrocycles, catenanes and rotaxanes: Template Directed Synthesis and Functionalization.....	10
	2.2.1. Template Directed Synthesis of Catenanes and Rotaxanes.....	10
	2.2.2. Anion and Amide Templated Synthesis of Catenanes and Rotaxanes.....	11
2.3.	Functionalization of Supramolecular Architectures.....	14
	2.3.1. Early Considerations and Functionalization of Macrocycles for Sensor Design.....	14
	2.3.2. Functionalization of Supramolecules - Modes of Functionalization... 16	
	2.3.2.1. <i>Post-functionalization Assembling (Post- functionalization Threading) and Post-assembly Functionalization (Post-threading Functionalization)</i>	16
	2.3.2.2. <i>Endo- and Exo-Functionalization of Supramolecules</i>	18
	2.3.3. Functionalization of Supramolecules and Supramolecular Assemblies – Functional Groups.....	20
2.4.	Self-Assembly: Combining and Addressing the Molecular Motion.....	23
	2.4.1. Self Assembled Systems, Reversibility and Supramolecular Chemistry.....	23
	2.4.2. Metal-Directed Self-Assembly of Pseudorotaxanes, Rotaxanes and Catenanes.....	25
	2.4.3. Covalent Self-Assembly.....	29
2.5.	Covalently Bound Interlocked Architectures.....	30

2.6.	Chirality in Supramolecular Systems: Topological Chirality in Interlocked Systems.....	31
2.7.	Energy Transfer in Interlocked Compounds.....	33
2.8.	An Easily Accessible Toolbox: Classical vs Toolbox-Oriented Synthesis.....	35
2.8.1.	Practical Emergence of the Tool-Box Oriented Synthesis.....	38
2.8.2.	Applying the Tool-Box Oriented Supramolecular System Synthesis to Generate a Tool-Box of Tetralactam Macrocycle Based Functionalized Supramolecular Architectures.....	42
3.	Results and Discussion.....	45
3.1.	Syntheses of the Key Compounds.....	45
3.2.	Functionalization of the Macrocycles.....	50
3.2.1.	Functionalization of the Key Macrocycles by Suzuki Coupling Reactions.....	50
3.2.1.1.	<i>Syntheses of Macrocycles for Self-Assembly.....</i>	<i>50</i>
3.2.1.2.	<i>Unsymmetrical functionalization on the tetralactam macrocycle: Pyrene-pyridine macrocycle.....</i>	<i>53</i>
3.2.1.3.	<i>Syntheses of Macrocycles for Multivalency and Photophysical Studies.....</i>	<i>54</i>
3.2.2.	Functionalized Macrocycles by Other Methods Than Coupling Reactions.....	55
3.3.	Studies on Functionalized Macrocycles.....	57
3.3.1.	Studies on Macrocycles with Photoactive Groups: Host-guest chemistry.....	57
3.3.2.	Studies on Macrocycles with Photoactive Groups: Absorbance Measurements.....	59
3.3.3.	Studies on Macrocycles with Photoactive Groups: Multivalent hosts.....	61
3.4.	Syntheses of Functionalized Rotaxanes.....	66
3.4.1.	Post-threading Functionalization of Key Rotaxanes by Suzuki Coupling.....	66
3.4.2.	Direct Synthesis of Rotaxanes From Functionalized Macrocycles.....	68
3.5.	Synthesis of a Functionalized Catenane.....	69

3.6.	Synthesis of Chiral Rotaxane and Catenane From an Achiral Macrocycle.....	70
3.7.	Energy Transfer Systems.....	72
3.7.1.	Synthesis of Functionalized Stoppers for The Energy Transfer Systems.....	72
3.7.2.	Synthesis of Rotaxanes for Studies of Intrarotaxane Energy-Transfer.....	76
3.8.	Self-Assembled Systems with Functionalized Macrocycles and Rotaxanes.....	77
3.8.1.	Metal-Directed Self-Assembly of Macrocycles and Rotaxanes.....	77
3.8.2.	Covalent Self-Assembly of Macrocycles.....	84
3.8.2.1.	<i>The Functionalized Macrocycles in Covalent Self-Assembly.....</i>	<i>84</i>
3.8.2.2.	<i>The Template for Covalent Self-Assembly of Macrocycles.....</i>	<i>85</i>
3.8.2.3.	<i>The Covalent Assembly with Aldehyde Macrocycle and a Trisamine.....</i>	<i>85</i>
4.	Conclusion and Outlook.....	86
4.1.	Toolbox Synthesis.....	86
4.2.	Outlook: Energy Transfer Systems and Layer-by-layer Self-Assembly.....	87
II.	A (TANDEM) ESI-FTICR MASS SPECTROMETRIC STUDY ON FRÉCHET-TYPE DENDRIMERS WITH AMMONIUM CORES.....	90
1.	Purpose of the Study and Introduction.....	90
2.	Results and Discussion.....	91
2.1.	ESI Mass Spectrometric Characterization of Fréchet Dendrons.....	91

2.2.	Dendritic Viologens: The Effect of Dendron Size on Dication Stability.....	95
2.3.	Collision-Induced Decay of Dendrimers Bearing Ammonium Ions at Their Focal Points.....	97
2.3.1.	Direct Peripheral Cleavage Mechanism.....	98
2.3.2.	In-to-Out Benzyl-Tropylium Rearrangement Cascade.....	99
2.3.3.	Cyclophane Formation Mechanism.....	104
2.3.4.	In-to-Out S _E ^{ar} Cascade Mechanism 1.....	105
2.3.5.	In-to-Out S _E ^{ar} Cascade Mechanism 2.....	106
2.3.6.	Investigations on the Mechanism with Different Peripheral Groups.....	107
3.	Conclusions.....	108
III.	HIERARCHICAL SELF-ASSEMBLY OF METALLO-SUPRAMOLECULAR NANO-SPHERES.....	109
1.	Purpose of the Study and Introduction.....	109
2.	Results and Discussion.....	110
2.1.	Synthesis of self-assembled metallo-supramolecular polymers and preparation of metallo-supramolecular nano-spheres and vesicles.....	110
2.2.	Imaging of metallo-supramolecular nano-spheres and vesicles.....	114
3.	Conclusion and Outlook.....	116
Experimental Part.....		118
E.1.	Analytical Techniques.....	118

E.2. Solvents and Other Chemicals.....	120
E.3. Abbreviations.....	120
E.4. Synthetical Procedures.....	121
E.4.1. Preliminary Compounds for the Tool-Box.....	121
E.4.2. Stoppers syntheses.....	132
E.4.3. Functionalized Macrocycles, Catenanes and Rotaxanes through Coupling Reactions.....	137
E.4.4. Functionalized Macrocycles by other methods than coupling reactions.....	158
E.4.5. Rotaxanes.....	161
<i>E.4.5.1. Functionalized rotaxanes through classical rotaxane synthesis.....</i>	<i>161</i>
<i>E.4.5.2. Amide-axle rotaxanes.....</i>	<i>166</i>
<i>E.4.5.3. Suzuki coupling on rotaxanes.....</i>	<i>167</i>
<i>E.4.5.4. Enantiomeric rotaxanes.....</i>	<i>169</i>
E.4.6. Syntheses of energy-transfer rotaxanes.....	170
E.4.7. Assemblies and Metal Complexes.....	174
E.4.8. Frechet Dendrimers (Part II).....	180
E.4.9. Hunter Ligand and Related Control Compounds (Part III).....	180
E.5. TEM experiments.....	185
 Summary / Zusammenfassung.....	 187
 References and Notes.....	 188
 Curriculum Vitae.....	 202
