

**The Role Of MAPK p44/42 And
MAPK p38 In Associative Olfactory
Learning In The Honeybee *Apis
Mellifera***

Dissertation zur Erlangung des akademischen Grades des
Doktors der Naturwissenschaften (Dr. rer. nat.)

eingereicht im Fachbereich Biologie, Chemie, Pharmazie
der Freien Universität Berlin

vorgelegt von

IRINA PLEKHANOVA

aus Moskau

Juni 2005

1. Gutachter: Prof. Dr. Uli Müller

2. Gutachter: Prof. Dr. Randolph Menzel

Disputation am 18. Juli 2005

Contents

1	Introduction	7
1.1	Learning and neuronal plasticity	7
1.2	Non-associative and associative learning	8
1.3	Models to study the processes of learning	9
1.4	Molecular mechanisms of learning and memory	11
1.5	The honeybee as a model to study the processes of learning	14
1.6	Olfactory Conditioning Paradigm	15
1.7	Memory dynamics and memory contents in the honeybee	16
1.8	The MAPK family and learning	18
1.8.1	Study on the contribution of the MAPK activation to learning and memory processes	18
1.8.2	General organization of the MAPK cascades	22
1.9	The goal of this work	27
2	Materials and Methods	28
2.1	Methods	28
2.1.1	Experimental animals	28
2.1.2	Behavioral methods	29
2.1.3	Immunohistochemistry	31
2.1.4	Western blot	31
2.1.5	Quantitative determination of the relative protein amount by ELISA (Enzyme Linked Immuno-Sorbent Assay)	35
2.2	Materials	39
2.2.1	Buffers and solutions	39
2.2.2	Chemicals	41
2.2.3	Antibodies and enzymes	41
2.2.4	Consumable supplies	42
2.2.5	Devices	42
3	Results	43
3.1	Establishment of the proper protocols (methods)	43

3.1.1	Treatment of the MAPK p44/42 and MAPK p38	43
3.1.2	Mammalian antibodies work in the honeybee brain	44
3.1.3	Inhibition and activation of the MAPK cascade <i>in vitro</i>	46
3.2	Localization of the MAPK p44/42 and MAPK p38 in the honeybee brain	50
3.3	MAPK p44/42 and non-associative learning	53
3.3.1	Habituation	53
3.3.2	Sensitization	54
3.4	MAPK p44/42 and MAPK p38 relative phosphorylation level	55
3.5	Comparison between forward-, backward-conditioned and naive animals	60
3.6	Inhibition of the MEK1/2 before conditioning	61
3.7	Inhibition of the MAPK p44/42 phosphorylation before, during and after associative learning	62
4	Discussion	65
4.1	Tools to investigate the MAPK cascade <i>in vivo</i>	65
4.2	Involvement of the MAPK cascade in non-associative learning	67
4.3	Localization of the MAPK p44/42 and MAPK p38 in the bee brain	68
4.4	Involvement of MAPK cascades in LTM	70
4.5	MAPK p44/42 activation and LTM in the honeybee	73
4.5.1	Time window of learning induced MAPK p44/42 activation	73
4.5.2	Possible mechanisms of MAPK p44/42 activation. Interaction with other signalling cascades	78
4.5.3	Potential targets of the MAPK p44/42 that could be involved in associative learning in the honeybee	81
5	Summary	86
6	Zusammenfassung (Deutsch)	88
	Bibliography	91
A	Abbreviations	110
