0	Outline	1
1	Review of the CO oxidation on Pt	5
	1.1 The platinum (110) surface	
	1.2 Carbon monoxide adsorption on Pt(110)	
	1.3 Oxygen on Pt(110)	
	1.4 Surface reconstruction mechanism	
	1.5 O ₂ + CO on Pt(110): the reaction	
	1.6 Reaction modeling	
2	Experimental	17
	2.1 The photoemission electron microscope – PEEM	
	2.2 The ellipsometry for surface imaging – EMSI	
	2.3 The infrared imaging – IRI	
	2.4 The sample	
3	TDS-PEEM Kinetics studies	23
	3.1 Introduction to the TDS	
	3.2 Facts about the CO adsorption-desorption on Pt(110)	
	3.3 QMS-TD measurements	
	3.4 The mathematical treatment	
	3.5 The PEEM-TD experiment	
4	The Subsurface Oxygen	37
5	Spirals on Amorphous Pt	43

6	The Surface Acoustic Waves	47
	6.1 Experimental	
	6.2 Results	
	6.3 Discussion	
	6.3.1 Mechanical effects	
	6.3.2 Electronic effects	
	6.4 Overall Conclusions	
7	Laser-Mediated Desorption on Pt(110)	63
	5.1 LIDT and chemical waves	
	5.2 LITD-EMSI investigations	
	5.3 LITD-EMSI: outlook and perspective	
8	Delayed Feedback Control	69
9	Summary	73
	Zusammenfassung	77
APPENDIX		
I	List of acronyms	81
II	Acknowledgements	82
III	Lebenslauf	83
