1.	Introduction	4
1.1.	Rhegmatogenous retinal detachment	4
1.1.1	Retinal detachment	4
1.1.2	Types of retinal detachment	5
1.1.3	Prevalence, pathogenesis and risk factors of RRD	5
1.1.4	Clinical features, examination and diagnosis	6
1.1.5	Treatment	7
1.1.5.1	Principles of surgical management	7
1.1.5.2	Methods of surgery	7
1.2	Pars plana vitrectomy	8
1.2.1	Indications of primary pars plana vitrectomy	8
1.2.2	Surgical technique	8
1.2.3	Intraoperative complications	9
1.3	Postoperative anatomic, functional results and prognostic factors	10
1.3.1	Postoperative anatomic results and prognostic factors	10
1.3.2	Postoperative functional results and prognostic factors	10
1.4	Postoperative complications and risk factors	11
1.4.1	Postoperative complications	11
1.4.2	Risk factors for postoperative proliferative vitreoretinopathy	12
1.4.3	Risk factors for postoperative macular pucker	13
2.	Questions	14
3.	Material and methods	15
3.1	Patients	15
3.2	Surgical technique	16
3.3	Ocular examinations	16

3.4	Preoperative assessment	16
3.5	Intraoperative assessment	17
3.6	Postoperative assessment	17
3.7	Data collection	17
3.8	Main outcome measures	18
3.9	Statistical analysis	19
4.	Results	24
4.1	Patients	24
4.1.1	Age and gender	24
4.1.2	Preoperative ocular characteristics	24
4.2	Surgical details	28
4.3	Postoperative outcomes	30
4.3.1	General postoperative outcomes	30
4.3.2	Anatomic outcomes	31
4.3.2.1	Primary and final success rate	31
4.3.2.2	Survival analysis of retinal redetachment	32
4.3.2.3	Analysis of risk factors for retinal redetachment	36
4.3.2.4	Causes of postoperative initial retinal redetachment	41
4.3.3	Functional outcomes	42
4.3.3.1	Postoperative best and final visual acuity	42
4.3.3.2	Prognostic factors of best and final visual acuity	43
4.3.3.3	Postoperative characteristics of patients with best and final VA	55
4.3.3.4	Reasons of poor final visual acuity (< 0.1)	56
4.4	Postoperative main complications	56
4.4.1	Postoperative PVR and macular pucker	57
4.4.1.1	Incidences of postoperative PVR and macular pucker	57
4.4.1.2	Risk factors analysis of postoperative PVR and macular pucker	57
4.4.1.3	Relationship between postoperative macular pucker and retinal redetachment	62
4.4.2	Postoperative cataract surgery	64

5.	Discussion	66
5.1	Indications of pars plana vitrectomy	66
5.2	Primary vitrectomy and intraoperative complications	66
5.3	Anatomic results	67
5.3.1	Anatomic success rate	67
5.3.2	Predictors of postoperative retinal redetachment	68
5.3.3	Causes of postoperative retinal redetachment	69
5.4	Functional results	71
5.4.1	Postoperative final visual acuity	71
5.4.2	Prognostic factors for postoperative final visual acuity	71
5.4.3	Reasons for final visual acuity of less than 0.1	73
5.4.4	Postoperative best visual acuity and prognostic factors	73
5.5	Postoperative PVR	74
5.5.1	Incidence of postoperative PVR	74
5.5.2	Risk factors for postoperative PVR	74
5.6	Postoperative macular pucker	75
5.6.1	Incidence of postoperative macular pucker	75
5.6.2	Risk factors for postoperative macular pucker	76
5.7	Relationship between postoperative cataract surgery and retinal redetachment	77
6.	Abstract	80
7.	References	82
8.	Abbreviations	91
9.	Acknowledgement	92
10.	Curriculum vitae	93
