

# A New Algorithmic Animation Framework for the Classroom and for the Internet

Inaugural-Dissertation zur Erlangung der Doktorwürde  
der Naturwissenschaften,

vorgelegt am Fachbereich Mathematik und Informatik  
der Freien Universität Berlin

von Margarita Esponda Argüero

Gutachter:  
Prof. Dr. Elfriede Fehr  
Prof. Dr. Thomas Strothotte

Datum der Disputation:  
Berlin, 16.07.2004

To the thinking soul images serve as if they were contents of perception (...) That's why the soul never thinks without an image.

Aristotle, *De Anima*, Book III, Chapter 7.

As sight is the most highly developed sense, the name *phantasia* (imagination) has been formed from *phaos* (light) because it is not possible to see without light.

Aristotle, *De Anima*, Book III, Chapter 3.

The words or the language, as they are written or spoken, do not seem to play any role in my mechanism of thought. The psychical entities which seem to serve as elements in thought are certain signs and more or less clear images which can be 'voluntarily' reproduced and combined.... this combinatory play seems to be the essential feature in productive thought before there is any connection with logical construction in words or other kinds of signs which can be communicated to others.

Albert Einstein in a letter to Jacques Hadamard [1949]

Graphical excellence is that which gives to the viewer the greatest number of ideas in the shortest time with the least ink in the smallest space.

The task of the designer is to give visual access to the subtle and the difficult – that is, the revelation of the complex.

[Tufte 83]

## Table of contents

Preface .....	3
Introduction.....	8
1 Algorithmic Animation in Education .....	11
1.1 The motivation for algorithmic animation.....	11
1.2 Algorithmic animation as a subfield of software visualization .....	14
1.3 Academic experience with algorithmic animation .....	15
1.4 Some preliminary conclusions.....	19
2 Survey of Algorithmic Animation Platforms.....	21
2.1 Prehistory of algorithmic animation .....	21
2.2 The emergence of computer animation systems.....	22
2.3 The BALSA family .....	23
2.3.1 BALSA and interesting events .....	23
2.3.2 BALSA II .....	25
2.3.3 Zeus and Collaborative Books .....	26
2.4 The TANGO family.....	29
2.4.1 The XTANGO system.....	29
2.4.2 Polka.....	31
2.4.3 Animation scripting – Samba.....	34
2.5 Other Algorithmic Animation Systems .....	35
2.5.1 ANIM – A minimal system .....	35
2.5.2 Mocha and Web animation.....	37
2.5.3 Leonardo.....	37
2.5.4 GAWAIN – Geometric Animation .....	38
2.5.5 Pavane and declarative animation .....	39
2.5.6 Other approaches.....	42
2.6 Sketch animation .....	43
2.7 Animation by handcrafting .....	44
2.8 Taxonomy and comparison of algorithmic animation systems .....	44
2.9 Conclusions and requirements for an algorithm animator.....	47
3 Principles of Algorithmic Animation .....	52
3.1 Animations and the visual channel .....	52
3.1.1 Traditional animations.....	53
3.1.2 Visual cues and Gestalt principles.....	54

3.1.3	Data structures of the mind and Gestalt learning theory .....	57
3.2	Pictorial representation of abstract concepts .....	59
3.2.1	Cognition and graphical conventions .....	60
3.2.2	Modern graphical conventions in computer science .....	61
3.3	A new graphical representation for heaps.....	73
3.4	Types of algorithmic animations .....	76
3.5	The Esthetics of Algorithmic Animation.....	78
3.5.1	Resorting Out Sorting.....	78
3.5.2	Data structures and Algorithms Learning Unit .....	89
3.6	Summary and discussion .....	92
4	Chalk Animator – Algorithmic Animation for an Electronic Chalkboard ....	95
4.1	The E-Chalk System .....	95
4.2	Good chalkboard animations – good paper animations .....	99
4.3	Reuse of macros in E-Chalk .....	101
4.4	Animations in discrete steps .....	102
4.5	Reversibility.....	103
4.6	The E-Chalk event format .....	103
4.7	Animation with sequences of stills .....	105
4.8	Overlaying images – pseudoanimation.....	107
4.9	Audio for the animations– explanatory narration .....	108
4.10	Python as pseudocode language .....	109
4.11	A scripted animation language .....	111
4.12	Examples .....	112
4.12.1	Seeing Quicksort.....	112
4.12.2	Convex hull algorithm .....	116
4.12.3	The Heapsort algorithm .....	118
4.13	Summary and discussion .....	119
5	Interactive Computer Driven Animation of Sketches.....	122
5.1	Sketches are esthetically appealing.....	122
5.2	Animations with sketched input .....	123
5.3	Executing a programming language in E-Chalk.....	128
5.3.1	Motivation for handwriting-programming .....	128
5.3.2	Tiniest BASIC .....	128
5.3.3	Tiniest BASIC execution.....	130
5.3.4	Animated pseudocode .....	132
5.4	Animated algorithms in E-Chalk with sketched input.....	133
5.5	Extracting the input from a macro .....	134

5.5.1	Bubble sort revisited.....	135
5.5.2	Prim's Algorithm for minimum spanning trees.....	137
5.6	The E-Chalk Interactive Application Interface.....	140
5.6.1	Description of the E-Chalk API .....	140
5.6.2	Classes and methods of the E-Chalk API.....	142
5.6.3	Example: bubble sort from sketched input.....	144
5.6.4	Dijkstra's algorithm.....	145
5.7	Summary and Discussion .....	147
6	Flashdance – An Algorithmic Animation Platform for the Web.....	150
6.1	The Flash animation engine.....	150
6.2	Flash animations - basics .....	152
6.3	ActionScript.....	156
6.4	A first overview of the Flashdance-System.....	160
6.5	The Flashdance script language.....	162
6.6	The object library.....	165
6.7	Instrumenting a program.....	166
6.8	The interpreter .....	168
6.9	Examples of animations.....	168
6.9.1	The Game of Life .....	168
6.9.2	Sorting Algorithms .....	170
6.9.3	Depth and Breadth First Search.....	177
6.9.4	The towers of Hanoi .....	179
6.10	Reversibility and Overlays .....	180
6.11	Instrumented Java classes .....	186
6.12	Summary and Discussion .....	188
7	Conclusions and Future Work .....	190
7.1	Good algorithmic animations .....	190
7.2	Evaluation of algorithmic animations.....	191
7.3	Abstract interpretation and algorithmic animation .....	194
7.4	The future of algorithmic animation .....	196
8	Summary of Contributions.....	198
	References.....	201
