

10. Acknowledgement

I want to thank Prof. Dr. Schlüter for their guidance and assistance during my work on this thesis paper. I have to thank Dr. Radcke and Dr. Pohl for carrying out the electrophoresis and ESI-MS/MS experiments that led to the protein identifications. I have to give special thanks my colleagues Mr. and Mrs. Jankowski, Mr. Thiemann and Mrs. Kurzawski for their help and encouragement during all day lab trouble times.

I also have to express my deepest gratitude to my family and my friends especially to Kirsten and Chikako for never letting me go down and always cheering me up.
