

Appendices

List of Figures

3.1	Haber-Bosch method	5
3.2	Molecular switch	6
3.3	Limonene	7
3.4	Asymmetric synthesis	8
4.1	Experimental chamber and manipulator head	11
4.2	Photoexcitation processes	13
4.3	Photoelectron spectroscopy	15
4.4	Surface state	16
4.5	Three step model	17
4.6	Shirley background	20
4.7	Tougaard background	21
4.8	Insertion devices	22
4.9	Beamline layouts - UE56/2	22
4.10	Beamline layouts - PM3	23
4.11	Insertion devices	24
4.12	Synchrotron polarisation	25
4.13	NEXAFS	26
4.14	NEXAFS simulation	27
4.15	NEXAFS interpretation	29
4.16	NEXAFS analysis - orbital vectors	31
4.17	NEXAFS analysis - angular dependent intensity	31
4.18	NEXAFS analysis - coordinate system	31

4.19	Beamline contamination - NEXAFS	32
4.20	STM setup	34
4.21	Tunneling scheme	35
4.22	Tunneling through a real potential	35
4.23	STM of Si(100)	37
4.24	SPECS VT-STM	38
4.25	UV arc lamp characteristics	40
4.26	StoBe calculation of NEXAFS spectra	45
4.27	Si(100) LEED	46
4.28	Cu(110) LEED	46
4.29	Stilbene	47
4.30	4,4'-Stilbene-dicarboxylic acid	47
4.31	Tartaric acid	48
4.32	Alanine	48
4.33	Cysteine	48
5.1	Nomenclature of cis/trans-isomers	49
5.2	Photochromic molecular switches	50
5.3	Molecular switch	51
5.4	Jablonski diagram of photoexcitation processes	52
5.5	Energy diagram of stilbene isomerisation	53
5.6	Isomerisation mechanisms	54
5.7	Stilbene isomerisation - one-bond flip	55
5.8	Stilbene isomerisation - hula-twist	56
5.9	Cis- and trans-stilbene	58
5.10	Stilbene unoccupied molecular orbitals	59
5.11	CK-NEXAFS of gas phase stilbene	61
5.12	CK-NEXAFS of gas phase stilbene - calculations	63
5.13	CK-NEXAFS of gas phase stilbene - theory	63
5.14	CK-NEXAFS of gas phase stilbene - comparison with theory	64

5.15 StoBe NEXAFS calculations	65
5.16 CK-NEXAFS of gas phase stilbene - comparison with theory	66
5.17 Stilbene on Si(100) - Si2p	70
5.18 Stilbene on Si(100) - C1s	71
5.19 SB charge distribution	72
5.20 Stilbene on Si(100) - C1s	73
5.21 Stilbene on Si(100) - C1s	73
5.22 Stilbene on Si(100) - valence band	75
5.23 Stilbene on Si(100) - NEXAFS	78
5.24 Stilbene on Si(100) - NEXAFS	79
5.25 Stilbene on Si(100) - angle resolved NEXAFS	80
5.26 Stilbene on Si(100) - adsorption model	81
5.27 Stilbene on Si(100) - angle resolved NEXAFS	82
5.28 trans-Stilbene on Si(100) - adsorption model	83
5.29 Stilbene on Si(100) - NEXAFS	84
5.30 Stilbene on Si(100) - UV exposure	86
5.31 Stilbene on Si(100) - UV exposure	87
5.32 Stilbene on Cu(110) - Cu3p	88
5.33 Stilbene on Cu(110) - C1s	89
5.34 Stilbene on Cu(110) - C1s	90
5.35 Stilbene on Cu(110) - Valence Band	91
5.36 Stilbene on Cu(110) - NEXAFS	92
5.37 Stilbene on Cu(110) - NEXAFS	93
5.38 Stilbene on Cu(110) - NEXAFS	94
5.39 Stilbene on Cu(110) - UV exposure	95
5.40 Stilbene on Cu(110) - UV exposure	96
5.41 Stilbene on Cu(110) - UV exposure	97
5.42 Stilbene on Cu(110) - UV exposure	98
5.43 Stilbene on Cu(110) - UV exposure	100

5.44	Molecular switch	102
6.1	Chiral isomers.	105
6.2	Chiral isomers	106
6.3	Surface adsorbate interactions	107
6.4	Examples for supramolecular assemblies	109
6.5	Prochirality on surfaces	110
6.6	Prochirality on surfaces	110
6.7	Prochirality on surfaces	111
6.8	Prochirality on surfaces	111
6.9	PVBA	112
6.10	Examples of PVBA adsorption	113
6.11	Stilbene derivatives DCSB and PVBA	115
6.12	Dicarboxy-stilbene on Cu(100) - C1s and O1s	116
6.13	Dicarboxy-stilbene on Cu(100) - STM	117
6.14	Adsorption of DCSB on Cu(110)	118
6.15	Adsorption sites for DCSB on Cu(110)	119
6.16	Molecular orbitals of DCSB on Cu(110)	120
6.17	Supramolecular assembly of DCSB on Cu(110)	121
6.18	Rectangular and Parquet Phase of DCSB on Cu(110)	122
6.19	Rectangular and parquet phases of DCSB on Cu(110) - all adsorption phases	124
6.20	Rectangular and parquet phases of DCSB on Cu(110) - hydrogen bonds . .	124
6.21	Rectangular and parquet phases of DCSB on Cu(110) - sublattices	125
6.22	Dicarboxy-stilbene on Cu(110) - energy diagram	127
6.23	Dicarboxy-stilbene on Cu(110)	129
7.1	Chiral descriptors.	132
7.2	Chirality index	134
7.3	Circular dichroism	137
7.4	Cotton effect	138

7.5	Circular dichroism	141
7.6	CDAD detection scheme	142
7.7	CDAD of CO	143
7.8	CDAD - measurement geometries	145
7.9	Detection of C1s-CD-spectra	146
7.10	Tartaric acid	147
7.11	Phase diagram of tartaric acid	149
7.12	$c(4 \times 2)$ - and $(9 0 \pm 1 2)$ -phase of tartaric acid	150
7.13	$c(4 \times 2)$ - and $(9 0 \pm 1 2)$ -phase of tartaric acid - surface state	151
7.14	Alignment of tartaric acid on the surface	152
7.15	Tartaric acid - C1s	153
7.16	Asymmetry in C1s-emission of tartaric acid	154
7.17	Asymmetry in C1s-emission of tartaric acid	155
7.18	Alanine and cysteine	157
7.19	Phase diagram of alanine	158
7.20	$(2 \pm 2 \mp 5 3)$ - and $(4 \mp 1 \pm 1 5)$ -Phase of adsorbed alanine and cysteine	159
7.21	Alanine and cysteine - C1s	160
7.22	Asymmetry in C1s-emission of alanine and cysteine	161
7.23	Asymmetry in C1s-emission of cysteine	162
7.24	Asymmetry in C1s-emission	163
A.1	Stilbene	xxxv
A.2	Stilbene	xxxv
A.3	4,4'-Stilbene-dicarboxylic acid	xxxvii
A.4	4,4'-Stilbene-dicarboxylic acid	xxxvii
A.5	Tartaric acid	xxxviii
A.6	Tartaric acid	xxxviii
A.7	Alanine	xxxix
A.8	Alanine	xxxix
A.9	Cysteine	xl

A.10 Cysteine xl
