

9. ACKNOWLEDGEMENTS

This work could not be possible without the help of my colleagues and friends. I would like to specially thank to:

Wolfgang Harneit, the leader of our group and my supervisor, without him this work would not be possible at all. He had always time to answer all my questions and helped solving all kinds of problems.

Prof. Hans-Heinrich Limbach, who agreed to become first reviewer of this work.

Prof. Martha Lux-Steiner, my second reviewer, for the nice time of research at HMI.

Carola Meyer, for introducing me to preparative HPLC and ESR.

Jens Mende from University of Stuttgart the man who showed me how ESR experiments are suppose to be done and how to design them.

Prof. Michael Mehring for his priceless advices concerning the explanation of the experimental data and the design of the pulse sequences.

Michael Scheloske for his support and his correction of this work.

Jens Hauschild and **Kati Hübener** for their constant support and encouragement during my work.

Rainer Döring for the ion implantation of the fullerenes.

Olga Bäßler for her help in the chemistry lab and for the constant encouragement.

Christian Spudat for making some of the experiments and for the nice time we spent in Berne.

Heike Süss and **Prof. Jürg Hulliger** from University of Berne for their collaboration in producing the first BrPOT crystals.

Jurgen Nuss from the Jansen group at Max Planck institute for solid state research in Stuttgart for making the XRD measurements of BrPOT.

Boyan Johnev for his constant help during my work at HMI and for the infinite number of good parties we had together.

Many thanks to all the people at HMI Wansee, especially to **Konstantin Fostiropoulos**, **Mirko Vogel** and the rest of SE2 Department for the nice time spent there.

I would like to thank also to the ESR group at HMI Adlershof - **Kai Peter**, **Christoph Böhme**, **Jan Berends** and their leader **Klaus Lips** who help me

a lot with my first steps in pulsed ESR.
