

Table of contents

1	Introduction	1
1.1	Physiological effects of thyroid hormones	1
1.1.1	Effects of triiodothyronine (T ₃)	1
1.1.1.1	Effects of T ₃ at nuclear receptors	1
1.1.1.2	Non-nuclear effects of T ₃	3
1.1.2	Physiological effects of diiodothyronines	5
1.1.2.1	Physiological effects of 3,5-diiodothyronine (3,5-T ₂)	5
1.1.2.2	Physiological effects of 3,3'-diiodothyronine (3,3'-T ₂)	8
1.2	Rationale for the choice of experiments performed in this study	9
1.2.1	Diiodothyronine serum concentrations in humans with thyroidal and nonthyroidal illnesses	9
1.2.2	Diiodothyronine concentrations in normal brain tissue and in brain tumors	11
1.2.3	Diiodothyronine concentrations in rat brain homogenates	11
1.2.4	Diiodothyronine concentrations in subcellular compartments	14
1.2.5	Effects of antidepressant treatment on diiodothyronine concentrations	14
1.2.6	Effects of circadian variations on diiodothyronine concentrations	15
1.3	Purpose of the study	15
2	Materials and Methods	17
2.1	Materials	17
2.1.1	Equipment for subcellular fractionation	17
2.1.2	Equipment for radiolabeling iodothyronines	17
2.1.3	Equipment for extracting, purifying, and separating iodothyronines	17
2.1.4	Equipment for RIA quantification	18
2.1.5	Chemicals and reagents for subcellular fractionation	19
2.1.6	Chemicals and reagents for radiolabeling iodothyronines	19
2.1.7	Chemicals and reagents for extracting, purifying, and separating iodothyronines	20
2.1.8	Chemicals and reagents for RIA quantification	20
2.1.9	Drugs	21
2.2	Studies in humans	21
2.2.1	Hormone determination in human serum	21
• 2.2.1.1	Healthy controls	21
• 2.2.1.2	Patients with thyroid disorders	22
• 2.2.1.3	Patients with different somatic, nonthyroidal diseases	22
•• 2.2.1.3.1	Patients with sepsis	22

• 2.2.1.3.2 Patients with head and/or brain injury.....	22
• 2.2.1.3.3 Patients with brain tumors and metastases.....	23
• 2.2.1.3.4 Patients with liver diseases.....	23
• 2.2.1.4 Acute stress.....	24
• 2.2.1.5 Sleep deprivation.....	24
2.2.2 Hormone determination in human brain tissue.....	25
• 2.2.2.1 Healthy donors.....	25
• 2.2.2.2 Samples of human brain tumors and metastases.....	26
2.3 Studies in experimental animals.....	26
2.3.1 Animals.....	26
2.3.2 Group 1: Control animals.....	26
• 2.3.2.1 Homogenates of different brain areas, pituitary glands, and liver of the rat.....	26
• 2.3.2.2 Subcellular fractions of rat brain regions.....	27
2.3.3 Group 2: Antidepressant treatment with desipramine.....	27
2.3.4 Group 3: Circadian variations of iodothyronines.....	27
2.4 Hormone determination.....	28
2.4.1 RIA buffers.....	28
2.4.2 Synthesis of 3,5-T ₂ tracer.....	28
2.4.3 Synthesis of 3,3'-T ₂ tracer.....	28
2.4.4 Preparation of 3,5-T ₂ -binding antibody.....	30
2.4.5 Preparation of 3,3'-T ₂ -binding antibody.....	31
2.4.6 RIA procedure for 3,5-T ₂ in serum and tissue samples.....	31
2.4.7 RIA procedure for 3,3'-T ₂ in serum and tissue samples.....	32
2.4.8 Serum determination of other iodothyronines and thyrotropin (TSH).....	32
2.4.9 Tissue determination of other iodothyronines.....	33
2.5 Preparation of animal and human tissue samples.....	34
2.5.1 Brain dissection in the rat.....	34
2.5.2 Subcellular fractionation.....	37
• 2.5.2.1 Homogenization of the single areas of the rat brain.....	38
• 2.5.2.2 Centrifugation of the homogenates.....	38
• 2.5.2.3 Isolation of the nuclear fraction.....	38
• 2.5.2.4 Isolation of the mitochondrial fraction.....	39
• 2.5.2.5 Isolation of the synaptosomal fraction.....	39
• 2.5.2.6 Isolation of the myelin.....	39
• 2.5.2.7 Isolation of the microsomal fraction.....	39
• 2.5.2.8 Electron microscopic characterization of the subcellular fractions.....	40
• 2.5.2.9 Characterization of the subcellular fractions by biochemical markers.....	40
2.5.3 Extraction of iodothyronines from the subcellular fractions.....	43
• 2.5.3.1 Suspension of the subcellular fractions.....	43

• 2.5.3.2 Extraction of the subcellular fractions.....	43
• 2.5.4.3 Preparation of the subcellular fractions and homogenate extracts for HPLC	45
2.5.5 Extraction of diiodothyronines from serum	45
2.5.6 Protein quantification.....	45
2.6 HPLC	46
2.6.1 Preparation of the tissue sample extracts for the autosampler	46
2.6.2 Purification and separation of the extracted iodothyronines by HPLC	47
2.6.3 Iodothyronine collection for RIA quantification	47
2.7 Data analysis	47
3 Results	49
3.1 Method validation	49
3.1.1 HPLC	49
• 3.1.1.1 Separation of iodothyronines by HPLC	49
• 3.1.1.2 Recovery of iodothyronines after extraction and HPLC.....	50
3.1.2 RIA for 3,5-T ₂	50
• 3.1.2.1 RIA sensitivity for 3,5-T ₂	50
• 3.1.2.2 Cross-reactivity of 3,5-T ₂ antibody with iodothyronines.....	50
• 3.1.2.3 Cross-reactivity of 3,5-T ₂ antibody with drugs	52
• 3.1.2.4 Recovery of “cold” 3,5-T ₂	53
• 3.1.2.5 Inter- and intra-assay coefficients of variation.....	53
3.1.3 RIA for 3,3'-T ₂	54
• 3.1.3.1 RIA sensitivity for 3,3'-T ₂	54
• 3.1.3.2 Cross-reactivity of 3,3'-T ₂ antibody with iodothyronines	55
• 3.1.3.3 Cross-reactivity of 3,3'-T ₂ antibody with drugs	56
• 3.1.3.4 Recovery of “cold” 3,3'-T ₂	57
• 3.1.3.5 Inter- and intra-assay coefficients of variation.....	57
3.2 Clinical Studies	58
3.2.1 Serum concentrations of 3,5-T ₂	58
• 3.2.1.1 Healthy controls	58
• 3.2.1.2 Patients with thyroid disorders	59
• 3.2.1.3 Patients with different somatic, nonthyroidal diseases.....	60
• 3.2.1.4 Acute stress	60
• 3.2.1.5 Sleep deprivation	61
3.2.2 Serum concentrations of 3,3'-T ₂ :	61
• 3.2.2.1 Healthy controls	61
• 3.2.2.2 Patients with thyroid disorders	62

• 3.2.2.3 Patients with different somatic, nonthyroidal diseases	62
• 3.2.2.4 Acute stress	63
• 3.2.2.5 Sleep deprivation	63
3.2.3 Serum concentrations of other iodothyronines and thyrotropin (TSH).....	64
3.2.4 Tissue levels of 3,5-T ₂	65
• 3.2.4.1 Human brain areas of healthy donors	65
• 3.2.4.2 Human brain tumors and metastases	67
3.2.5 Tissue levels of 3,3'-T ₂	67
• 3.2.5.1 Human brain areas of healthy donors	67
• 3.2.5.2 Human brain tumors and metastases.....	68
3.2.6 Tissue levels of other iodothyronines in human brain areas of healthy donors.....	68
3.2.7 Tissue levels of other iodothyronines in human brain tumors and metastases.....	69
3.3 Animal studies	71
3.3.1 Serum concentrations of 3,5-T ₂ and 3,3'-T ₂ in control animals	71
3.3.2 Tissue levels of 3,5-T ₂	71
• 3.3.2.1 Homogenates of various brain areas of the rat	71
• 3.3.2.2 Subcellular fractions of brain areas of the rat.....	73
3.3.3 Tissue levels of 3,3'-T ₂	74
• 3.3.3.1 Homogenates of various brain areas of the rat	74
• 3.3.3.2 Subcellular fractions of brain areas of the rat.....	74
3.3.4 Tissue levels of other iodothyronines	76
• 3.3.4.1 Homogenates of various brain areas of the rat	76
• 3.3.4.2 Subcellular fractions of brain areas of the rat.....	78
3.3.5 Effects of antidepressant drugs on brain subcellular concentrations of 3,5-T ₂ and 3,3'-T ₂	79
3.3.6 Effects of circadian variation on concentrations of 3,5-T ₂ and other iodothyronines.....	82
4. Discussion	87
4.1 3,5-T ₂ serum and tissue concentrations in humans.....	87
4.2 3,3'-T ₂ serum and tissue concentrations in humans.....	91
4.3 3,5-T ₂ serum and tissue concentrations in rats	94
4.4 3,3'-T ₂ serum and tissue concentrations in rats.....	100
5 Summary.....	103
6 Reference List.....	106

Curriculum Vitae	117
List of Publications.....	119
Poster and Slide Presentation.....	121
