Acknowledgments

First of all I would like to express my gratitude to my supervisor Prof. Dr. Ricardo Hermosilla for all his scientific and personal advice, support and excitement for science. I would like to thank him for interesting discussions and for the opportunity to work in his group.

I would like also to thank Prof. Dr. Hartmut Oschkinat for being the reviewer of this thesis and his attendance to supervise it in the faculty of Biology, Chemistry and Pharmacy.

I am also grateful to Prof. Dr. Walter Rosenthal for all his advice and helpful scientific discussions.

Special thanks go to all the people in Dahlem and in Buch, who let me have a good time in the lab. I would like to mention Katja Lautz, Solveig Großmann, Alejandra Pérez Sastre and Philipp Voigt here for being my friends, for their ongoing support and for the very enjoyable experience to work with them.

Further I want to thank Dr. Eberhard Krause and Michael Schürmann for their cooperation and the time they spent on my mass spectrometry samples.

I thank the “Deutsche Forschungsgemeinschaft (DFG)” for financial support during the thesis.

Last but not least I want to thank my family and my friends for all their support through-out the years.
