

Shape-Persistent Macrocycles with Bipyridine Units: Progress in Accessibility and Widening of Applicability

INAUGURAL – DISSERTATION

zur Erlangung des akademischen Grades
Doktor der Naturwissenschaften
Dr. rer. nat

des Fachbereichs
Biologie, Chemie und Pharmazie
der Freien Universität Berlin

von

Dorina Maria Oprea
aus Halmasd, Rumänien

im Dezember 2004

Die vorliegende Arbeit wurde in der Zeit von März 2001 bis Juni 2004 am Institut für Chemie / Organische Chemie der Freien Universität Berlin unter der Anleitung von Herrn Prof. Dr. A. Dieter Schlüter und Herrn Prof. Dr. H.-U. Reissig durchgeführt.

1. Gutachter: Prof. Dr. H.-U. Reissig
 2. Gutachter: Prof. Dr. P. Bäuerle
- Tag der Disputation:

Acknowledgements

A doctoral dissertation can never be accomplished without the involvement of many other people in various forms of interaction, support, advice, technical help, and last but not least: motivation.

Firstly I thank Prof. Dr. Dieter Schlüter for giving me the chance to start this work in his group and his advice during the project. At the same time, I'd also like to thank Prof. Dr. H. Reissig for agreeing to take over the supervision reviewing this thesis.

My sincere thanks go to all the people for their excellent collaboration and helpful discussion on this project, most especially to Prof. M. Venturi, Prof. V. Balzani and Dr. F. Marchioni, Bologna University, Italy, for their photophysical and electrochemical investigations, Privatdozent Dr. D. Lentz, FU Berlin, for the competent single crystal X-ray work, Dr. P. Franke, FU Berlin, for countless MALDI-TOF mass spectrometric measurements, Dr. A. Schaefer, and Dr. Holzmann, FU Berlin, for their continuous help with NMR and MS measurements.

I also want to thank our department technical staff in particular: Ms. Zimmerman for GPC measurement, Ms. Kahn and Ms. Peuker for the NMR measurements, Ms. Ostwald for mass spectrometric measurements, Ms. Vasak for doing the elemental analyses, and Mr. Kohlrep for all HPLC separations. I also want to thank Mr. Martin Colussi, ETH Zürich, for DSC and TGA measurements.

I would like to thank to my friend Dr. Christian Grave for the helpful discussions we had, for giving me invaluable help and encouragement during some troublesome situations.

Many thanks to Jutta Hass and Dr. Pamela Winchester for their secretarial help and continuous support.

Thanks also go to all the group members with whom I had the pleasure of working together: Dr. Christian Grave, Dr. Sabine Fuchs, Dr. Fabian Kutzner, Dr. Afang Zhang, Dr. Matthias Beinhoff, Dr. Zhishan Bo, Dr. Changmei Zhang, Dr. Lijin Shu, Dr. Wolf-Dietrich Neudorff, Mihaiela Stuparu, Ramchandra Kandre, Dr. Stefan Müller, Edis Kasemi, Rabie Al Hellani, Hakan Atasoy, Cindy Münzenberg, Dirk Schubert, Dr Prashant Sonar, Gabriela Hertel and Susanne von Gersdorf. Many thanks to Anzar Khan for our intense scientific exchange.

I am indebted to my husband and my family for their permanent support, encouragement and guidance.
