## Acknowledgment

For the provision of such an interesting research topic, the opportunity to work at the Research Institute and the constant support I'd like to thank Dr. WB. Souffrant. In particular I really appreciate the trust he had in me and that he introduced me so successfully to the world of research.

Furthermore I want to thank Prof. O. Simon for the academic supervision of my PhD studies.

I'm grateful to Mr R. Gaeth for taking such good care of our animals and on whom I could always rely.

For the accurate and reliable laboratory analyses of our masses of samples I'd like to thank Mrs Köpnick, Mrs Gratopp, Mrs Voigt, Mrs Prignitz, Mrs Waischnow und Mr Booth. Especially I appreciate Mr Booth's willingness to share a good deal of his laboratory space with me. I'm indebted to Mrs Köpnick for the great provision – with conversation, food & care - of our 'operation-team' during the long days of surgery.

Dr Guiard I'd like to thank for his indispensable advice and help in matters of statistics.

Of course I'd like to thank all staff members of the RU Nutritional Physiology 'Oskar Kellner' for their support in scientific, analytical and organizational respect.

I can't fail to mention all my fellow PhD students working in the Research Institute for cheering me up at our regular 'PhD-meetings'. Above all I'm greatly indebted to Pawel without whom surgery would have been exceedingly more difficult & boring and who helped me a lot during my trials. Thanks for being such a good office mate (...is this chocolate box empty already?) and friend!

Furthermore I want to thank my colleagues from the Netherlands and the UK who gave me the chance to work with them. Hartelijk bedankt Antoon, Sergey, Hauke, Barbara, Ajay and Martin! Thanks a lot to Bevis and to Jenny.

Last but not least I'm grateful to my friends for their support and for putting up with me even in times I wasn't such joyful company.

**There are hardly words enough to thank my parents for all they've done for me. I'm very grateful for your constant support and trust in me & all my endeavours. You listened uncomplainingly to every piglet story and didn't loose patience with me even in challenging times. And of course thanks to my brother Christopher who always brightened my day and still doesn't take me too seriously. THANK YOU!**
