Coping as a Personality Process:
How Elderly Patients Deal with Cataract Surgery

Nina Knoll

Dissertationsschrift zur Erlangung des Doktorgrades der Philosophie am Fachbereich Erziehungswissenschaft und Psychologie der Freien Universität Berlin

Berlin 2002

Gutachter:

Prof. Dr. Ralf Schwarzer

Priv.-Doz. Dr. Clemens Tesch-Römer

Disputation: 8. Mai 2002

To Hildegard Hauck and Charlotte Knoll

Table of Contents

Acknowledgments…….. XV
Abstract……... XVI
Zusammenfassung…….. XVII

1. Introduction **1**
2. Theoretical Background **5**
2.1 Personality……. 5
2.1.1. The Integrative Hierarchical Structure of Personality Traits…… 7
2.1.2 Assessment of the Big Five: The NEO Personality Inventory……. 10
2.1.3. Limitations of the Five-Factor Solutions…….. 12
2.1.4. Stability of Interindividual Differences over the Life-Span……. 13
2.1.5. On the Coexistence of Stability and Change…… 15
2.2. Coping with Stress…… 17
2.2.1. The Psychodynamic Perspective on 'Coping'……... 17
2.2.2. The Stimulus-Based Perspective…….. 19
2.2.3. The Transactional Perspective…….. 20
2.2.4. Personality and Coping……. 23
2.2.5. Formal Classification of Coping……... 27
2.2.6. Content-Free Aspects of Coping……..…… 28
2.2.7. Coping in Old Age…… 31
2.2.8. Coping in Old Age - Empirical Results…… 34
2.3. Outcomes in Stress and Coping Research……. 35
2.3.1. Positive and Negative Affect…… 36
2.3.2. A Word on Interrelatedness: Personality and Affect…… 38
2.3.3. Health, Affect, and Old Age…… 40
2.3.4. Anxiety, Fear, Stress……. 42
2.3.5. Coping Satisfaction……... 44
2.4. Longer-Term Outcomes in Coping Research…… 46
2.4.1. Emotional Well-Being…….. 46
2.4.2. Functional Adaptation……... 48
2.5. Selection of the Study Setting……... 50
2.5.1. Perioperative Stress……... 50
2.5.2. The Cataract…….. 52
2.5.3. Cataract Surgery…… 52
3. Central Research Questions and Hypotheses **55**
3.1. A Stressor Indeed?…… 55

3.1.1. Expected Changes in State Affect Pre- to Post-Surgery……... 55
3.1.2. Change in Longer-Term Outcome Measures: Well-Being……... 57
3.1.3. Change in Longer-Term Outcome Measures: Functional…… 58
3.2. Personality: Prediction of Outcomes During the Situation and Beyond?……. 59
3.2.1. Personality Traits and Situation-Specific Outcomes…… 59
3.2.2. Personality Predicts Longer-Term Outcomes……... 61
3.3. Age and Situation-Specific Coping versus Dispositional Coping……..…….... 63
3.4. Coping: Prediction of Outcomes During the Situation and Beyond?…… 64
3.4.1. Situation-Specific Coping Predicts Affect and Coping Satisfaction…… 64
3.4.2. Dispositional Coping Predicts Long-Term Outcomes…….. 67
3.5. Differential Effects Regarding Personality and Coping…… 69
3.6. Coping as a Personality Process?…….. 70
3.7. 'Content-Free' Aspects of Coping: Selective Coping and Total Range of Coping 71
4. Method **73**
4.1. Participants……... 73
4.1.1. Recruitment Procedures…… 73
4.1.2. Exclusion Criteria……. 74
4.1.3. Sample Size and Rate of Participation……. 74
4.1.4. Chronological Age and Gender…… 75
4.1.5. Sociodemographic Variables…… 76
4.1.6. General Health Status…… 77
4.1.7. Ophthalmic Data……... 78
4.1.8. Major Variables Under Study: Biases Due to Drop Out?……. 80
4.2. Materials and Measures…… 82
4.2.1. The Study Information Brochure…….. 82
4.2.2. Demographic Variables……. 83
4.2.3. Control Variables…….. 83
4.2.4. Personality Traits -The German Adaptation of the NEO-FFI…….. 84
4.2.5. The ‘Big Three’ in the Present Study…… 85
4.2.6. Coping……... 87
4.2.7. Two Content-Free Aspects of Coping…….. 94
4.2.8. Situation-Specific Outcomes: Positive and Negative Affect…… 94
4.2.9. Positive and Negative Affect in the Present Study……... 96
4.2.10 Situation-Specific Outcomes: Coping Satisfaction…….. 99
4.2.11. Longer-Term Outcomes: Depressive Symptoms……. 100
4.2.12. Longer-Term Outcomes: Life-Satisfaction…….. 100
4.2.13. Another Long-Term Outcome: Vision-Related Functional Status……... 101
4.3. Data Assessment and Design…… 102
4.4. Analyses…… 104

4.4.1. Treatment of Missing Values and Outliers……... 104
4.4.2. General Analytic Procedures…… 105
5. Results **110**
5.1. Descriptive Results: Situation-Specific Outcomes…… 110
5.1.1. Distribution of State Affect Measures…….. 110
5.1.2. Changes in State Affect Around Surgery……. 111
5.1.3. Unique Time Effects: State Negative Affect…… 112
5.1.4. Unique Time Effects: State Positive Affect……. 114
5.1.5. Covariates of State Positive and Negative Affect…… 116
5.1.6. Satisfaction with Coping Efforts……... 120
5.2. Descriptive Results: Longer-Term Well-Being Outcomes……... 121
5.2.1. Depressive Symptoms: Distribution and Correlates……. 122
5.2.2. Life Satisfaction…… 124
5.3. Descriptive Results: Longer-Term Vision-Related Functional Outcomes…… 125
5.4. Descriptive Results: Major Predictors…….. 128
5.4.1. NEO-Personality Traits: Distribution and Correlates……... 128
5.4.2. Coping: Distribution and Correlates……. 129
5.4.3. Two Content-Free Aspects of Coping: Selective Coping versus Total Range of Coping…… 132
5.5. Testing Mediation with Situation-Specific Measures……... 134
5.5.1. Personality Variables Predict State Affect…… 134
5.5.2. N, E, and O Predict State Positive Affect……. 135
5.5.3. Neuroticism and Openness Predict State Negative Affect…… 137
5.5.4. Situation-Specific Coping Predicts State Affect……... 139
5.5.5. Situation-Specific Coping Predicts State Positive Affect……. 140
5.5.6. Situation-Specific Coping Predicts State Negative Affect……... 141
5.5.7. Personality Predicts Situation-Specific Coping…… 146
5.5.8. Coping as a 'Personality Process'?…… 149
5.5.9. Coping Mediates the Relationship Between Personality Traits and Negative Affect?…… 150
5.5.10. Coping Mediates the Relationship Between Higher-Order Personality Traits and Positive Affect?…… 153
5.5.11. Summary Thus Far: Coping as a Personality Process?……. 158
5.5.12. Testing an Alternative Model: "Differential Effectiveness"……. 158
5.5.13. Another Situation-Specific Outcome: Satisfaction with Coping Predicted by Personality?……. 160
5.5.14. Situation-Specific Coping Predicts Satisfaction with Coping Efforts?…… 161
5.5.15. Does Coping Mediate between Personality and Coping Satisfaction?……. 162

5.5.16. Testing Coping as a Moderator between Personality and Coping Satisfaction…… 163
5.6. Testing the Mediator Hypothesis with Long-Term Measures……... 164
5.6.1. Personality Predicts Depression and Life Satisfaction……. 165
5.6.2. Dispositional Coping Predicts Depressive Symptoms and Life Satisfaction…… 167
5.6.3. Personality Predicts Dispositional Coping?…….. 169
5.6.4. Evidence for Mediation between Neuroticism and Depressive Symptoms?…… 170
5.6.5. Differential Effectiveness: Testing Possible Moderation…… 171
5.6.6. Visual Acuity Post-Surgery and Long-Term Well-Being: Personality and Coping as Moderators?……... 172
5.7. Better Vision - More Action for Some?…… 176
5.7.1. Neuroticism and Openness Predict Aspects of Functional Status Six Weeks Post-Surgery…….. 176
5.7.2. Openness: See Better, Complain Less?……. 178
5.7.3. Habitual Coping Predicts Vision-Related Functional Status Post-Surgery.. 179
5.7.4. Adjusting to Better Vision on a Functional Level: Partly a Matter of Openness, Dispositional Coping, or Both?…….. 182
5.7.5. Would Dispositional Coping Moderate the Relationship Between Visual Acuity and Functional Status?…….. 185
5.7.6. Better Vision, More Action for Some: Summary So Far…… 185
5.8. Selective Coping Versus Total Range of Coping…… 187
5.8.1. More Content-Free Aspects of Coping Predict Sit.-Spec. Outcomes…….. 187
5.8.2. More Content-Free Measures Predict Affect Above and Beyond Content of Coping Efforts?……... 192
5.8.3. Distal Well-Being Predicted by Dispositional Content-Free Coping Measures?……. 193
5.8.4. More Content-Free Aspects of Dispositional Coping Predict Functional Status?……... 194
5.8.5. Associations Between Higher-Order Personality Traits and More Content-Free Coping Measures…… 195
5.8.6. Evidence for Content-Free Aspects as Mediators?……... 196
5.9. General Summary……. 201
6. Discussion **207**
6.1. A Stressor Indeed?…… 207
6.2. Satisfaction with Coping Efforts as Another Situation-Specific Outcome…….... 210
6.3. Depressive Symptoms and Life Satisfaction……. 211

6.4. Long-Term Functional Outcomes…… 213
6.5. Coping and Age…… 214
6.6. Gender and Coping…… 217
6.7. Unique Effects of Coping Predicting Situation-Specific Outcomes……. 218
6.8. Unique Relations of Dispositional Coping with Long-Term Outcomes……... 223
6.9. Dispositional Coping and Functional Limitations……. 225
6.10. Unique Predictions of Coping Generally…….. 227
6.11. Mediation and Unique Effects of Personality: Coping as a Personality Process? 228
6.12. Personality Predicts Coping Predicts Outcome?……... 231
6.12.1. Emotionally Labile Versus Emotionally Stable Patients…….. 231
6.12.2. Extraverts Versus Introverts……. 234
6.12.3. High versus Low Openness to Experience……... 236
6.12.4. Neuroticism and Extraversion Lacking Explicit Affectivity Items…….. 238
6.13. Two Approaches to More Content-Free Aspects of Coping……. 238
6.13.1. Selective Coping: The Better Way to Cope?…… 238
6.13.2. Total Range of Coping: Troubled Souls Overreact and Make it Worse Instead of Better?…….. 239
6.14. Indirect Effects of NEO-Personality Traits on Outcomes via 'Content-Free' Coping……... 241
6.15. Limitations of the Present Study and Perspectives for Future Research…….. 242
6.16. Conclusions……... 245
7. References **248**
8. Appendices **264**
8.1. Appendix A: Comparison of Berlin and Mainz Patients…….. 264
8.2. Appendix B: Central Constructs…… 269
8.3. Appendix C: Documentation of Analyses……. 274
8.3.1. The Brief COPE: Inter-Item and Inter-Scale Correlations of the Original Two-Item Subscales…….. 274
8.3.2. The Brief COPE: Documentation on the Final CFA Models of the Situation-Specific and Dispositional Versions……. 276
8.3.3. The PANAS: Additional Analyses on PA and NA Subfacets…….. 277
8.3.4. Additional Control Analyses for the Prediction of State Positive Affect…. 278
8.3.5. Additional Control Analyses for the Prediction of Coping by Higher-Order Personality Traits…… 280
8.3.6. Additional Documentation of Analyses Concerning Coping Satisfaction… 281
8.3.7. Content-Free Aspects of Coping Predict Affect Balance……. 282
8.3.8. Content-Free Aspects of Coping Predicting Affect Above and Beyond Content Scales?……. 283

8.3.9. Content-Free Aspects of Coping Predicting Long-Term Outcomes Above and Beyond Content Scales?……. 285
8.3.10. Age and Multimorbidity……... 286
8.4. Appendix D: Net of Affectivity Versions Neuroticism/S and Extraversion/S Additional Analyses ……. 287
8.4.1. Neuroticism/S and Extraversion/S Predict Positive Affect…….. 287
8.4.2. Neuroticism/S Predicts Negative Affect……... 289
8.4.3. Neuroticism/S and Extraversion/S Predict Long-Term Outcomes……... 290
8.4.4. Neuroticism/S and Extraversion/S Predict Coping…….. 290
8.4.5. Neuroticism/S and Extraversion/S Predict the Affects: Directly and Indirectly……... 292
8.4.6. Neuroticism/S Predicts Longer-Term Outcomes: Directly and Indirectly... 295
8.4.7. Neuroticism/S Predicts Positive Affect: Directly and Indirectly via Selective Coping……... 295
8.4.8. Neuroticism/S Predicts Intensity of Limitations at t1: Directly and Indirectly via Total Range of Coping/D……... 296
8.5. Appendix E: Additional Information on Materials and Tests……... 297
8.5.1. Consent Form: Participation (German)…… 297
8.5.2. Consent Form: Participation (English)……. 297
8.5.3. Consent Form: Patient Confidentiality (German)…… 298
8.5.4. Consent Form: Patient Confidentiality (English)……. 298
8.5.5. The Brief COPE: German and English Versions (Carver, 1997)……. 299
8.5.6. The PANAS: German and English Versions (Watson, Clark, & Tellegen, 1988)……. 302
8.5.7. Assessment of Vision-Related Functional Status (after Javitt, et al., 1997)……. 302

List of Figures

Figure 1	*Mediator model*……	107
Figure 2	*Mean Negative Affect (+/- one standard error, range 1 to 4) at all measurement points in time*……	112
Figure 3	*Means of Negative Affect subfacets at all measurement points in time*……	113
Figure 4	*Mean Positive Affect (+/- one standard error, range 1 to 4) at all measurement points in time*……	114
Figure 5	*Means of Positive Affect subfacets over all measurement points in time*……	115
Figures 6/7	*Separate affect means for 1st Eye versus 2nd Eye patients over all assessments*……	118
Figure 8	*Mean depressive symptom sumscores for men and women*……	122
Figure 9	*Overall means (+/- one standard error) of intensity of limitations upon admission and six weeks post-surgery*……	126
Figure 10	*Means of situation-specific and dispositional coping subscales*……	130
Figure 11	*Means for situation-specific active coping in patients receiving invasive versus non-invasive forms of local anesthesia*……	131
Figure 12	*Patients low (a) and high (b) in selective coping, situation-specific coping profiles*……	133
Figure 13	*Mean Negative Affect pre-surgery for patients high versus low in Openness to Experience*……	138
Figure 14	*Simple Positive Affect means across the two pre-surgical time points for different age-groups with different levels of Support Seeking (situation-specific)*……	144
Figure 15	*Mean Negative Affect upon admission for men and women high and low in levels of Support Seeking (situation-specific)*……	146
Figure 16	*Relationship among Neuroticism, situation-specific coping, and Negative Affect at t1*……	151
Figure 17	*Relationship among Neuroticism, situation-specific coping, and Negative Affect at t2*……	152
Figure 18	*Relationship among Openness, situation-specific coping, and change from Negative Affect at t1 to Negative Affect at t2*……	153
Figure 19	*Relationship among Openness, situation-specific coping, and Positive Affect at t1*……	154
Figure 20	*Relationship among Extraversion, situation-specific coping, and Positive Affect at t2*……	154
Figure 21	*Relationship among Extraversion, situation-specific coping, and change of Positive Affect at t1 to Positive Affect at t2*……	155

Figure 22 *Relationship among Neuroticism, situation-specific coping, and Positive Affect at t3*…… 157
Figure 23 *Relationship among Neuroticism, situation-specific coping, and change of Positive Affect at t2 to Positive Affect at t3*…… 157
Figure 24 *Mean Positve Affect pre-surgery for groups high versus low in Extraversion and Focus on Positive coping (situation-specific)*…….. 160
Figure 25 *Relationship among Neuroticism, situation-specific coping, and coping satisfaction*…… 163
Figure 26 *Relationship among Neuroticism, dispositional coping, and depressive symptoms six weeks post-surgery*…… 171
Figure 27 *Mean sumscores of depressive symptoms six weeks post-surgery by levels of Neuroticism and post-surgical visual acuity in the eye operated on.* ….. 174
Figure 28 *Simple means for participants high in change in visual acuity,comparing open individuals and their counterparts*…… 179
Figure 29 *Relationship among Openness, dispositional coping, and change in number of activities from t1 to t4*…… 182
Figure 30 *Simple means of number of activities (with glasses on) for low dispositional active copers with high and low levels of Openness over time*…… 184
Figure 31 *Relationship among Openness, selective coping (situation-specific), and Positive Affect at t1*…… 197
Figure 32 *Relationship among Neuroticism, selective coping (situation-specific), and Positive Affect at t3*…….. 198
Figure 33 *Relationship among Neuroticism, selective coping (situation-specific), and change in Positive Affect from t2 to t3*…… 198
Figure 34 *Relationship among Neuroticism, total range of coping/D (dispositional), and vision-related intensity of limitation at t1*…… 200

List of Tables
