

Acknowledgement

First of all I would like to thank my mother and my brother for help in tough times.

I would like to thank my former lab members Nico Andreas, Julia Friedrich and Ferenc Lohanata and DRFZ colleagues Daniel Schaumann, Timo Gaber and Reinmar Undeutsch for help and nice atmosphere.

Manuela Ohde from the Bundesinstitut für Risikoberwertung made great efforts for maintaining my mouse strains.

Dr. Arndt Schilling and Dr. Michael Amling were helping me with the bone histomorphometric analysis.

I am grateful to Prof. Dr. Petra Knaus and Prof. Dr. Wolfgang Schuster being referees for my PhD thesis.

I would like to mention Dr. Uwe Klemm for showing me mouse manipulation techniques, supplying me with mouse strains and spontaneous help.

Last but not least I would like to thank my boss Dr. Jean-Pierre David for constant support.
