

# Acknowledgements

Throughout the course of this thesis so many people have generously given their time, to whom I would like to express my gratitude in the following.

I would like to thank Prof. Dr. M. C. Lux-Steiner for giving me the opportunity to realize this thesis in her department at the Hahn-Meitner-Institut Berlin and for her support and many helpful suggestions and discussions, in particular during the period of writing.

I would also like to thank Prof. W. B. Brewer, PhD, for agreeing to be the 2<sup>nd</sup> supervisor for this thesis, as well as for his interest in this work and for helpful discussions.

Special thanks to Dr. Christian-Herbert Fischer for his advice, supervision, guiding and encouragement throughout the course of this thesis. Without those this thesis would not have been possible. In particular, I want to thank him for the numerous discussions about chemical questions, in which I could rely on his expertise, as well as for the great time I had working in the ILGAR-group.

Many thanks go to Dr. Nicholas Allsop for so many discussions and advices about all kinds of topics in the field of materials science and photovoltaics, as well as for his assistance with the SEM and his proof-reading of my manuscripts. I would also like to thank him for introducing me to the ILGAR-Lab and to SE2 at the beginning of my work at the HMI. Another special thank goes to Nick for leading the way, when I was lost in (reciprocal) space.

Special thanks also go to Dr. Sebastian Lehmann for his help with basically every single machine at the HMI.

Many thanks also to Dr. Sophie Gledhill for her assistance with the SEM and a lot of proof-reading.

I would also like to thank all the members of the ILGAR-group for all the discussions, the help in the lab and for a great time.

Further thanks go to Dr. Jörg Rappich, Dr. Eveline Rudigier, Felice Friedrich, Dr. Norbert Nickel and Dr. Thomas Riedle for their help and suggestions regarding Raman spectroscopy.

Many thanks also go to Dr. Daniel Abou-Ras for many discussions, TEM sample preparation and measurements, proof-reading, as well as for his assistance with the SEM and EDX measurements. Also thanks to Ulli Bloeck, for her TEM sample preparation and measurements

## Acknowledgements

---

Also, Dr. Wolfgang Bohne, Dr. Jörg Röhrich and Dr. Erik Strub are gratefully acknowledged for performing and evaluating the ERDA measurements at the ISL.

Special thanks also go to Carola Kelch and Michael Kirsch for doing the KCN etching, CdS-deposition, sputtering of ZnO and molybdenum, as well as for grid deposition.

Many thanks also go to Jo Klaer and his team, as well as to Prof. Dr. Susan Schorr and Dr. Yvonne Tomm for providing reference samples.

I would also like to thank Dr. Sebastian Fiechter for his help with chemsage, Dietmar Hennig and Reiko Müller for fixing the setup, whenever it broke, the CISSY-group for helping me with the PES measurements and Timo Kropp for his help with the XRD.

Furthermore, I want to thank Dr. Reiner Klenk, Dr. Roland Mainz and David Kieven who introduced me to SCAPS and contributed a lot to the simulations.

Additionally, I want to thank Dr. Gwenaél Gouadec and Prof. Dr. Gert Irmer for their helpful answers to my questions about phonon confinement.

Thanks also go to Dr. Thomas Schmid and Prof. Dr. Renato Zenobi, who realized the Raman mapping measurements and the TERS measurements.

Further thanks go to Dr. Klaus Ellmer and his group for providing the epitaxial  $\text{In}_2\text{O}_3$ /sapphire samples.

Of course, also special thanks go to all my colleagues in SE2, SE3 and the rest of the HMI, who helped me to complete this thesis and to enjoy the time I spent at the HMI.

I also want to express my deepest gratitude to my parents who always supported me and how made it possible from the very beginning.

My deepest thanks go to Dana, who supported me through all three years of this thesis with her love and encouragement, however my mood was.

# Statement

I hereby declare that this submission is my own work and that, to the best of my knowledge and belief, it contains no material previously published or written by another person, except where due acknowledgement is made in the text.

I also declare that the intellectual content of this thesis is the product of my own work, even though I may have received assistance from others on style, presentation and language expression.

# Erklärung

Ich erkläre hiermit, dass ich die vorliegende Arbeit selbstständig verfasst, andere als die angegebenen Quellen und Hilfsmittel nicht verwendet und die den benutzten Quellen wörtlich oder inhaltlich entnommenen Stellen als solche kenntlich gemacht habe. Die Arbeit wurde weder in gleicher noch ähnlicher Form einer anderen Prüfungsbehörde vorgelegt, noch veröffentlicht.
