

Text tables

Table 1:	Overview of selected findings with different tubing materials and compounds	6
Table 2:	Overview of selected findings with different microdialysis probes and compounds.....	8
Table 3:	Overview of selected microdialysis findings with different perfusate additives.....	10
Table 4:	Selected properties of the model lipophilic compound (ZK 975) and the model hydrophilic compound (ZK 894).....	12
Table 5:	Selected characteristics of the five tubing materials tested	13
Table 6:	Selected characteristics of the 11 concentric microdialysis probes tested	14
Table 7:	List of equipment used	15
Table 8:	List of solvents and solutions used.....	16
Table 9:	List of miscellaneous materials used.....	16
Table 10:	Example of a data set with the calculation of K_A , K_B and K (mean \pm standard deviation).....	24
Table 11:	Dimensions of the five tubing materials tested	31
Table 12:	Percentage of parent compound in the medium before, and after 1.5 hours storage at room temperature	42
Table 13:	Selected properties of the eleven microdialysis probe materials tested	44
Table 14:	Percentage of parent compound in the medium before, after 1.5 hours and after 3.5 hours storage under experimental conditions as for the probe tests	86
