TABLE OF CONTENTS

1. Introduction……6

2.Review Literature……..8

2.1 Anatomy and development of the elbow joint……8

2.2 Biomechanics of the elbow joint ……..……12

2.3 Canine Elbow Dysplasia (ED)……..……15

2.3.1 Etiology ……15

2.3.2 Pathogenesis……16

2.3.2.1 Osteochondritis dissecans (OCD)……17

2.3.2.2 Trochlear notch dysplasia……..19

2.3.2.3 Asynchronous growth of the radius and ulna……20

2.3.3 Diagnostic Imaging Technique of Canine Elbow Dysplasia…….……..23

2.3.3.1 Radiography…….……...23

2.3.3.2 Computer Tomography……...……27

2.3.3.2.1 Image Formation…….……28

2.3.3.2.2 Image interpretation……30

2.3.3.2.3 Computer Tomography in Canine Elbow Dysplasia……..…..31

2.3.3.3 Arthroscopy…….……...33

2.3.3.3.1 Principles……33

2.3.3.3.2 Complications……..36

2.3.3.3.3 Advantages and Disadvantages……..37

2.3.3.3.4 Elbow Joint Arthroscopy……..……38

2.3.4 Treatment of Canine Elbow Dysplasia…….……...40

3. Comparative diagnosis of Canine Elbow Dysplasia between Radiography, Computer Tomography and Arthroscopy ……42

3.1 Materials and Methods……....…….42

3.1.1 Dogs….....42

3.1.2 Radiographic examination …….…….……...45

3.1.3 CT examination…….…….49

3.1.4 Arthroscopic examination …….…….50

3.2 Evaluation of findings and statistical analysis…….……..54

3.3 Results…….……..55

3.3.1 Radiographic findings……....55

3.3.2 CT findings……58

3.3.3 Arthroscopic findings……...….62

3.4 Comparison of radiographic findings and CT findings…….64

4. Evaluation the joint space of Canine Elbow Dysplasia by using reconstructed computer tomography……..65

4.1 Dogs……..65

4.2 CT examination……...……65

4.3 Method of measurement……...……66

4.4 Statistical Analyses……...68

4.5 Result……68

4.6 Inter-image variation analysis……..71

5. Discussion……...73

6. Summary…….…...84

7. Zusammenfassung…….…….86

8. References……...…...…88

9. Appendix……...114

10. Curriculum vitae……124

11. Acknowledgements...……..125

12.Selbständigkeitserklärung…….….126
