

Acknowledgments

I would like to thank the following people for their support in the course of this study. Special thanks to Prof. Dr. Dieter Naumann for giving me the opportunity to work on this project as well as for his interest, support and discussions over the results.

Thanks to Prof. Dr. Wolfram Saenger for reviewing this work.

The experimental part of the project could not be possible without the cooperation between the project groups “Biomedical spectroscopy” P25 and “Transmissible spongiform encephalopathies” P24 at the Robert Koch Institute. I am especially grateful to Dr. Michael Beekes for the careful planning and management of the animal experiments as well as for his helpful advises and to Marion Joncic for her practical work in the animal experiments. Thanks to Dr. Walter Schulz-Schaeffer from the Institute of Neuropathology, Georg-August University, Göttingen, Germany, for providing the human brain samples.

For the nice working atmosphere I would like to thank: Angelika Brauer, Maren Stämmler, Anh NgoThi, Ariane Kretlow, Fabian Sokolowski, Janina Kneipp, Carolin Kirschner, Ralf Moritz, Heinz Fabian, Peter Lasch, Marion Joncic, Kristin Kampf, Ramona Famulla, Gudrun Lenz, Jessica Mai, Christine Kratzel, Karin Lemmer, Achim Thomzig and Dominique Krüger.

In various ways and occasions Gudrun Lenz, Lidia Alexieva-Grund, Maren Stämmler, Anh NgoThi, and Fabian Sokolowski have been very helpful by making my living in Berlin easier for which I am sincerely thankful to them all.

I thank my numerous friends, who gave and give me moral support and never let me lose my sense of humour. Детелиц, Лили, Лорде, вие знаете за какво още...

And last but not least, to my family: Мамо, татко, това което съм постигнал, го дължа на вас! Мария, Ненчо благодаря за родкрепата ви! Most of all I would like to thank my wife and daughter their love and unlimited patience.

~~Thank you!~~
