

Index

- algorithm
 - computing the Fréchet distance
 - between polygonal curves, 9
 - deciding the weak Fréchet distance
 - between simple polygons, 58
 - deciding the weak Fréchet distance between triangulated surfaces, 36
 - semi-computing the Fréchet distance between triangulated surfaces, 19
- average Fréchet distance, 65
- combined reachability graph, 54
- computation problem, 1
- convex decomposition of a simple polygon, 45
- critical values
 - for the Fréchet distance between polygonal curves, 8–9
 - for the Fréchet distance between simple polygons, 60–62
 - for the weak Fréchet distance between triangulated surfaces, 36–39
- curves and surfaces, 5
- decision problem, 1
- discrete Fréchet distance
 - between polygonal curves, 9–11
 - between triangulated surfaces, 17–19
- Fréchet distance, 2–3, 6–7
- free space diagram
 - of polygonal curves, 7
 - of triangulated surfaces, 28–30
- Hausdorff distance, 6
- hourglass, 45
 - generalized, 45
- matching problem, 1
- mesh homeomorphism, 15
- metric, 66
- model of computation, 11
- parametrized curves and surfaces, 5
- path integral, 67
- reachability structure, 7–8
- relaxed triangle inequality, 66
- semi-computability
 - of real-valued functions, 14
 - of the Fréchet distance between triangulated surfaces, 19–21
- shape matching, 1–2
- shortest path in a simple polygon, 45
- simple polygon, 41
- simplicial curves and surfaces, 5
- summed Fréchet distance, 65
- triangle inequality, 66
- weak Fréchet distance, 25–28
