

**Identification of tubulin as a TRPV1-interacting  
protein and functional characterization of  
TRPV1 - cytoskeleton regulation.**

Inaugural-Dissertation  
zur Erlangung des akademischen Grades Dr. rer. nat.  
am Fachbereich Biologie, Chemie, Pharmazie  
der Freien Universität Berlin

vorgelegt von  
**Chandan Goswami**  
am Institut für Chemie und Biochemie  
Berlin 2005

Die vorliegende Arbeit wurde in der Arbeitsgruppe von Prof. Dr. Ferdinand Hucho (AG Neurochemie) am Institut für Chemie und Biochemie des Fachbereiches Biologie, Chemie, Pharmazie der Freien Universität Berlin angefertigt.

1. Gutachter: Prof. Dr. Ferdinand Hucho, FB Biologie, Chemie, Pharmazie
2. Gutachter: Prof. Dr. Gerd Multhaup, FB Biologie, Chemie, Pharmazie

Eingereicht am: 30.12.2005, Berlin  
Disputation am: 29.3.2006, Berlin

## *Declaration*

I, Chandan Goswami, do hereby declare that this submission is my own work and that, to the best of my knowledge and belief, it contains no material previously published or written by another person, nor material which to a substantial extent has been accepted for the award of any other degree or diploma of a university or other institute of higher learning, except where due acknowledgement is made in the text.

---

Chandan Goswami

# TABLE OF CONTENTS

|   |    |
|---|----|
| <b>1. Introduction</b> .....  | 9  |
| <b>1.1. General overview about the TRP Channels</b> .....   | 9  |
| <b>1.2. TRPV1</b> .....   | 11 |
| 1.2.1. Molecular structure of TRPV1.....  | 13 |
| 1.2.2. TRPV1 as a non-selective cation channel.....   | 15 |
| <b>1.3. Expression and distribution of TRPV1</b> .....  | 16 |
| <b>1.4. Stimuli and ligands of TRPV1</b> .....  | 18 |
| 1.4.1. Physical stimuli (high temperature and low pH).....  | 18 |
| 1.4.2. Chemical stimuli.....  | 19 |
| <b>1.5. Modulation of TRPV1 by post-translational modifications</b> .....   | 21 |
| <b>1.6. Role of TRPV1 in nociception: TRPV1 as a pain receptor <i>in vivo</i></b> .....                                     | 22 |
| <b>1.7. TRPV1 as a potential drug target</b> .....  | 25 |
| <b>1.8. The TRPV1 signalling complex: Known Protein Interactors of TRPV1</b> .....  | 27 |
| Calmodulin.....   | 27 |
| Protein kinase A (PKA).....   | 27 |
| Protein kinase C (PKC).....   | 28 |
| CamKII and Calcineurin.....   | 29 |
| Snapin and Synaptogamin IX.....   | 29 |
| Eferin.....   | 29 |
| <b>1.9. Aim of the study</b> .....  | 30 |
| <b>2. Result</b> .....  | 31 |
| <b>2.1. Identification and characterization of Tubulin as a Ca<sup>2+</sup>-sensitive interactor for TRPV1</b> .....        | 32 |
| 2.1.1. Detection of Ca <sup>2+</sup> -sensitive interactions of the TRPV1 C-terminal fragment.....                          | 33 |
| 2.1.2. Identification of tubulin as TRPV1 interacting protein.....  | 35 |
| 2.1.3. Tubulin, but not actin, co-precipitates with full-length TRPV1 in anti-TRPV1 immunoprecipitation.....                | 35 |
| 2.1.4. Purified tubulin alone binds to the C-terminal sequence of TRPV1, but not with the N-terminal portion of TRPV1 ..... | 38 |
| 2.1.5. TRPV1 cytosolic domains do not interact with soluble actin or neurofilament .....                                    | 40 |
| 2.1.6. MBP-TRPV1-Ct, but not MBP-TRPV1-Nt, interacts also with polymerized forms of tubulin.....                            | 41 |

|   |           |
|---|-----------|
| 2.1.7. Tubulin interaction with MBP-TRPV1-Ct, but not MBP-TRPV1-Nt, allows microtubule formation under conditions that otherwise destabilize microtubules ..... | 42        |
| 2.1.8. MBP-TRPV1-Ct, but not MBP-TRPV1-Nt, stabilizes microtubules against cold-induced depolymerization in a Ca <sup>2+</sup> -sensitive manner.....           | 44        |
| <b>2.2. Characterization of the TRPV1-tubulin interacting region.....</b>   | <b>47</b> |
| 2.2.1. $\beta$ -tubulin, but not $\alpha$ -tubulin interacts with TRPV1.....  | 48        |
| 2.2.2. TRPV1 interacts with tubulin and microtubules through two small, basic sequences stretches located in the C-terminal cytoplasmic domain.....             | 49        |
| 2.2.3. Tubulin interaction is conserved in some other members of the TRPV1 subfamily.....   | 53        |
| <b>2.3. Understanding of TRPV1-cytoskeleton interaction.....</b>  | <b>55</b> |
| 2.3.1. TRPV1 co-localizes with tubulin.....   | 56        |
| 2.3.2. Activation of TRPV1 alters the microtubule-cytoskeleton pattern.....   | 56        |
| 2.3.3. Activation of TRPV1 results in increased tubulin solubility due to disassembly of microtubules.....  | 58        |
| 2.3.4. Visualizing microtubule disassembly due to TRPV1 activation in live cell.....  | 61        |
| 2.3.5. TRPV1-mediated microtubule dispersal in stably transfected cells.....  | 63        |
| 2.3.6. Dynamic microtubule structures are affected by TRPV1 activation.....   | 66        |
| 2.3.6. TRPV1-enriched membrane patches contain inextricable tubulin.....  | 70        |
| 2.3.7. Over-expression of TRPV1-Ct results in the formation of bundled microtubules and stabilizes them.....  | 71        |
| <b>2.4. Presence of TRPV1 at nerve endings. Regulation of growth cone morphology and movement by TRPV1 activation.....</b>                                      | <b>77</b> |
| 2.4.1. TRPV1 is present in synaptic structures (synaptosomes).....  | 78        |
| 2.4.2. TRPV1 is localized at neurites and growth cones.....   | 78        |
| 2.4.3. TRPV1 localizes to the C- and P-zone of growth cones.....  | 80        |
| 2.4.4. TRPV1-GFP localizes to the growth cone.....  | 80        |
| 2.4.5. Fast and slow transport of TRPV1 to the growth cones.....  | 81        |
| 2.4.6. TRPV1-enriched patches at growth cones provide stability and guidance to pioneer microtubules.....   | 82        |
| 2.4.7. The N-terminal sequence is important for localization at nerve endings while the C-terminus is important for the stabilization of microtubules.....      | 85        |
| 2.4.8. Activation of TRPV1 results in retraction of growth cones.....   | 85        |
| 2.4.9. Activation of TRPV1 results in changes of the microtubule organization at growth cones.....  | 87        |

|   |            |
|---|------------|
| 2.4.10. Activation of TRPV1 results in formation of varicosities within the neurites due to disassembly of microtubules.....                      | 89         |
| 2.4.11. Embryonic DRG explant-derived growth cones collapse due to the activation of TRPV1.....   | 89         |
| <b>3. Discussion.....</b>   | <b>93</b>  |
| <b>3.1. Tubulin as an interactor of TRPV1: Structural relevance.....</b>  | <b>94</b>  |
| 3.1.1. Identification of C-terminal interacting proteins by a proteomics approach.....  | 94         |
| 3.1.2. Tubulin as a Ca <sup>2+</sup> -sensitive interactor of TRPV1.....  | 96         |
| 3.1.3. Tubulin binding site located within TRPV1.....   | 97         |
| 3.1.4. Structure of C-terminal cytoplasmic domain of TRPV1 and tubulin interaction.....   | 101        |
| 3.1.5. Biological significance of the interaction between TRPV1 and microtubules.....   | 103        |
| 3.1.6. Importance of the C-terminus of TRPV1 in the channel function and regulation.....  | 104        |
| <b>3.2. TRPV1 activation and microtubule cytoskeleton.....</b>  | <b>106</b> |
| 3.2.1. Rapid disassembly of dynamic tubulin due to TRPV1 activation is partly independent of Ca <sup>2+</sup> influx and may involve enzymes..... | 106        |
| 3.2.2. The microtubule cytoskeleton as a down stream effector for TRPV1 activation.....   | 110        |
| 3.2.3. Involvement of the cytoskeleton in pain path ways.....   | 111        |
| 3.2.4. Regulation of TRPV1 channel function by microtubule drugs: Is TRPV1 – tubulin interaction is both ways? .....                              | 112        |
| 3.2.5. Role of TRPV1 in cancer and cancer pain.....   | 114        |
| <b>3.3. TRPV1 and cytoskeleton: Importance for neuronal connection formation.....</b>   | <b>115</b> |
| 3.3.1. TRPV1 at the growth cone. Important for path finding.....  | 115        |
| 3.3.2. Over-expression of TRPV1 and neuritogenesis.....   | 120        |
| 3.3.3. TRPV1 and other TRP channels behave as synaptic proteins.....  | 122        |
| <b>4. Summary (Zusammenfassung).....</b>  | <b>124</b> |
| <b>5. Future prospect.....</b>  | <b>127</b> |
| <b>6. Materials.....</b>  | <b>129</b> |
| 6.1. Chemicals.....   | 129        |
| 6.2. KITS and Markers.....  | 130        |
| 6.3. Purified proteins and fractions.....   | 131        |
| <b>6.4. SOFTWARE.....</b>   | <b>131</b> |
| 6.5. Mammalian cell lines.....  | 131        |

|   |            |
|---|------------|
| 6.6. Bacterial cell lines.....  | 131        |
| 6.7. Primary antibodies.....  | 132        |
| 6.8. Secondary antibodies and related reagents.....                           | 132        |
| For immunofluorescence.....   | 132        |
| For western blot analysis.....  | 133        |
| 6.9. Peptides.....  | 133        |
| 6.10. Vectors.....  | 133        |
| 6.11. Enzymes.....  | 134        |
| 6.12. Constructs .....  | 134        |
| 6.13. Primers.....  | 135        |
| <b>7. Methods.....</b>  | <b>137</b> |
| <b>7.1. Methods related to molecular biology.....</b>                         | <b>137</b> |
| 7.1.1. Construct preparation.....   | 137        |
| 7.1.2. Polymerase Chain Reaction (PCR).....                                   | 137        |
| 7.1.3. Restriction digestion of dsDNA.....                                    | 138        |
| 7.1.4. Ligation of dsDNA.....   | 138        |
| 7.1.5. Agarose gel electrophoresis.....                                       | 138        |
| 7.1.6. Competent <i>E.coli</i> cell preparation.....                          | 139        |
| 7.1.7. Transformation of <i>E.coli</i> .....                                  | 139        |
| <b>7.2. Methods related to protein chemistry.....</b>                         | <b>141</b> |
| 7.2.1. Separation of denatured proteins by SDS-PAGE.....                      | 141        |
| 7.2.2. Coomassie staining of the protein bands in gel.....                    | 142        |
| 7.2.3. Silver stain of the protein bands in gel.....                          | 142        |
| 7.2.4. Western blot analysis.....   | 143        |
| 7.2.5. MALDI-MS.....  | 144        |
| 7.2.6. Cross-linking of proteins.....   | 144        |
| 7.2.7. Biotinylation of tubulin.....  | 144        |
| <b>7.3. Methods related to protein purification.....</b>                      | <b>145</b> |
| 7.3.1. Purification of Tubulin.....   | 145        |
| 7.3.2. Preparation of high-speed detergent extracted spinal-cord extract..... | 146        |
| 7.3.3. Prokaryotic expression and purification of MBP-fusion proteins.....    | 146        |

|  |            |
|--|------------|
| 7.3.4. Protein estimation.....   | 146        |
| <b>7.4. Methods related to protein interaction.....</b>  | <b>147</b> |
| 7.4.1. MBP-Pull-down assay for identifying TRPV1 interacting proteins.....   | 147        |
| 7.4.2. Other pull down assays to characterize TRPV1 - Tubulin interaction.....   | 147        |
| 7.4.3. Immunoprecipitation assay.....  | 147        |
| 7.4.4. Blot overlay.....   | 148        |
| <b>7.5. Methods related to microtubule interaction and dynamics.....</b>   | <b>149</b> |
| 7.5.1. Co-sedimentation assay with taxol®-stabilized microtubules, microtubule<br>formation, and cold-induced disassembly of microtubules..... | 149        |
| <b>7.6. Methods related to cell biology.....</b>   | <b>150</b> |
| 7.6.1. Cell culture and transfection.....  | 150        |
| 7.6.2. Generation of a stable TRPV1 expressing F11 cell line.....  | 150        |
| 7.6.3. TRPV1 activation, isolation of cytoskeleton ( <i>In situ</i> and biochemical) from mammalian cell.....                                  | 150        |
| 7.6.4. Assessment for nocodazole-resistant microtubules from mammalian cell.....   | 151        |
