

# Contents

<b>Chapter 1: Introduction.....</b>	<b>1</b>
1.1 Nonlinear dynamics in electrochemistry.....	1
1.2 General kinetic description of the electrochemical interface.....	2
1.2.1 Electrical double layer.....	2
1.2.2 Dynamical instabilities at electrochemical interface.....	4
(A) Negative differential resistance (NDR).....	4
(B) Origin of electrochemical bistable and oscillatory behavior.....	5
1.3 Spatiotemporal description of the electrochemical interface.....	8
1.3.1 Integral formalism for reaction-migration systems.....	9
1.3.2 Coupling function on a ring electrode.....	12
1.4 Electrochemical formic acid (HCOOH) oxidation.....	14
1.4.1 Mechanism of the HCOOH system.....	14
1.4.2 Oscillatory instabilities for the HCOOH system.....	16
1.5 Motivation and outline of the thesis.....	17
 <b>Chapter 2: Experimental Setup and Materials.....</b>	 <b>19</b>
2.1 Experimental cell and electrode setup.....	19
2.2 Electrodes.....	21
2.2.1 Working electrode.....	21
2.2.2 Reference electrode.....	22
2.3 Electrolyte solution.....	22
2.4 Experimental methods.....	22
2.4.1 Potential microprobe measurements.....	22
2.4.2 Apiezon wax coating.....	24
2.5 Instrumentation and data processing.....	24
2.5.1 Potentiostat / galvanostat.....	24
2.5.2 Data acquisition.....	26

<b>Chapter 3: Spatiotemporal Self-Organization on a Pt Ring Electrode in Bi-enhanced HCOOH Oxidation (Galvanostatic Conditions).....</b>	<b>29</b>
3.1 Introduction.....	29
3.2 Experimental.....	33
3.3 Results.....	35
3.3.1 Effect of bismuth ions on oxidation of formic acid.....	35
3.3.2 Period doubling and experimental approach to a <i>Shil'nikov</i> orbit.....	36
3.4 Discussion.....	42
 <b>Chapter 4: Spatiotemporal Self-Organization on a Ring with Asymmetrically Placed Reference Electrode.....</b>	 <b>43</b>
4.1 Introduction.....	43
4.2 Experimental.....	44
4.3 Experimental results.....	45
4.3.1 Perturbation in the bistable state.....	45
4.3.2 Pattern formation in the oscillatory state.....	48
4.4 Discussion.....	52
 <b>Chapter 5: Spatiotemporal Self-Organization on a Pt Ribbon Electrode.....</b>	 <b>57</b>
5.1 Introduction.....	57
5.2 Experimental.....	59
5.3 Experimental results.....	61
5.3.1 Potential perturbation in the active state.....	61
5.3.2 Front transition on ribbon electrode in the bistable regime (local & remote triggering).....	63
5.3.3 Effects of RE position in the oscillatory regime.....	64
5.4 Summary and discussion.....	68

<b>Chapter 6: Spatiotemporal Self-Organization on a Partially Insulated Pt Ring</b>	
<b>Electrode.....</b>	<b>73</b>
6.1 Introduction.....	73
6.2 Experimental.....	75
6.3 Experimental results.....	76
6.3.1 Pattern formation with close reference electrode ( $\beta=0$ ).....	76
(A) Edge effect of insulator in the stationary state.....	76
(B) Spatiotemporal pattern sequences in cyclic voltammetry.....	77
(C) Pattern formation at constant applied potential.....	79
(D) Pattern formation with increasing reaction time.....	80
6.3.2 Travelling pulse waves and pulse reversal.....	82
6.3.3 Saltatory conduction of travelling pulse wave.....	86
6.3.4 Pattern formation with large distance of reference electrode ( $\beta=0.5$ ).....	93
6.3.5 Pattern formation with two & three insulated areas ( $\beta=0$ ).....	96
(A) Two-insulator system.....	96
(B) Three-insulator system.....	101
6.3.6 Autonomous transition from passive to active state on partially insulated ring electrodes ( $\beta=0$ ).....	108
6.4 Discussion.....	110
<b>Chapter 7. Summary.....</b>	<b>115</b>
<b>Chapter 8. Deutsche Zusammenfassung.....</b>	<b>119</b>
<b>References.....</b>	<b>123</b>

<b>Curriculum Vitae.....</b>	<b>i</b>
<b>List of Publications.....</b>	<b>iii</b>
