I wish to express my genuine gratitude to a number of people whose support made this thesis possible.

I am very much obliged to my advisor Prof. Dr. G. Ertl for his academic advice, constant encouragement and financial support during my graduate school years at Fritz-Haber-Institut der Max-Planck-Gesellschaft. I would also like to thank Dr. M. Eiswirth for special way of coaching, for valuable discussions and kind guidance during this research. I am also grateful to Prof. Dr. K. Christmann for being my second advisor.

I am indebted to Prof. Tak Yongsug, Prof. Chung Sung Taik in Inha University in Korea for their continuous moral support.

Special thanks to Dr. Lee Jaeyoung (who motivated me to come to the Fritz-Haber Institut for my Ph.D) for his initial experimental support and friendship, Anke Senses, Sabine Wasle and Ingeborg Reinhardt for their tremendous help and friendship during the past 3 years.

Espacially, I thank my Korean friends, Choi Jinsub, Kim Sang Hoon, Lee Seung Mi, Kim Hong Bong and Kim Jeong Won for comments on my life as well as mental support.

I am really grateful to my family and family-in-law in Korea, especially to my parents and my mother-in-law for their continuous support and encouragement. At last, I want to express my special thanks to my wife, Jin-Hee. I would not have fulfilled my Ph.D thesis without her support. This thesis is dedicated to Seungwon, my son.
