

Acknowledgments

I would like to express my sincere thanks to everyone who contributed to the completion of this work. In particular, I would like to thank

my supervisor PD Dr. Enno Klußmann for the possibility to carry out this study in his laboratory, for guidance, open-minded discussions and support.

Prof. Dr. Walter Rosenthal for providing excellent working conditions at the FMP and in the Department of Signal Transduction, and for constructive and helpful discussions.

Prof. Dr. Volker Haucke for his kind attendance as reviewer.

Dr. Márta Szaszák for many inspiring discussions and experiments on cardiac myocytes without which this work would have been less complete. Her help and efforts have made a difference.

Dr. Bastian Zimmermann and his team at Biaffin for excellent SPR measurements.

Dr. Carolyn Vargas and Dr. Peter Schmieder for STD-NMR experiments.

Dr. Dorothea Lorenz and Dr. Jens Furkert for electrophysiological and cAMP measurements, Hendrikje Immig for PKA activity data, Dr. Mangesh Joshi for the 2D-NMR experiment, Dr. Jens Peter von Kries and Franziska Hinterleitner from the FMP Screening Unit for their excellent support in high throughput screening, Andrea Geelhaar and Beate Eisermann for help with the IMCD and cardiac myocyte cell cultures, Jenny Eichhorst and Dr. Burkhard Wiesner for assistance with microscopes, statistics and for organising the amazing Schmilka group retreats, Philipp Skroblin for RII overlays and for attending great concerts of odd bands, Dr. Sabine Friedl and Anita Neumann for the construction and purification of RII proteins, Dr. Vedrana Tabor, and Sina Meyer, Prof. Dr. Jörg Rademann, Dmitry Kashin and Dr. Hans-Gottfried Genieser for synthesis of compounds.

All the other present and former members of the Anchored Signalling and the Protein Trafficking group for the excellent working environment, in which fun was not a foreign word although I sometimes treated them with (too) strange music.

Dr. Volker Henn, Dr. Christian Hundsrucker and Prof. Dr. Roger Johnson for priceless scientific advices, good discussions of all kinds and for running rings around me on the squash court.

my parents - without their constant support and encouragement I would have never come as far as I am now.

my wife Larissa for motivation, patience and for sharing fantastic experiences unthinkable with anyone else.
