

Table of contents

1. Introduction	1
2. Literature	3
2.1. Anthrax	3
2.1.1. History	3
2.1.2. Ecology and Epidemiology	4
2.1.3. Bacteriology	6
2.1.4. <i>B. anthracis</i> spores	7
2.1.4.1. Spore coat	7
2.1.4.2. Spore germination	8
2.1.5. Vegetative cells	8
2.1.5.1. S-layer and capsule	8
2.1.5.2. Anthrax toxin	9
2.1.5.2.1. Protective antigen	10
2.1.5.2.2. Oedema factor	10
2.1.5.2.3. Lethal factor	11
2.1.6. Regulation of virulence factors	11
2.1.6.1. CO ₂ effect	11
2.1.6.2. Growth phase dependent toxin expression	12
2.1.7. Pathogenesis	12
2.1.8. Clinical Features	13
2.1.8.1. Human anthrax	13
2.1.8.1.1. Cutaneous anthrax	13
2.1.8.1.2. Gastrointestinal anthrax	13
2.1.8.1.3. Pulmonary anthrax	13
2.1.8.2. Livestock/domesticated animals	14
2.1.8.2.1. Peracute form	14
2.1.8.2.2. Acute form	14
2.1.8.2.3. Subacute or chronic form	14

2.1.9. Therapy	15
2.1.9.1. Human therapy	15
2.1.9.2. Livestock therapy	15
2.1.10. Vaccines	16
2.1.10.1. Livestock vaccine	16
2.1.10.2. Human vaccines	17
2.2. Interaction of <i>B. anthracis</i> and innate immune cells	18
2.2.1. Macrophages	18
2.2.2. Dendritic cells	19
2.2.3. Neutrophils	19
2.3. Neutrophils	20
2.3.1. Neutrophil recruitment	20
2.3.2. Bacterial recognition by neutrophils	21
2.3.3. Neutrophil killing mechanisms	21
2.4. Antimicrobial peptides	24
2.4.1 Defensins	24
2.5. Study aim	26
<u>3. Methods</u>	27
3.1. Bacterial assays	27
3.1.1. Bacterial strains	27
3.1.2. Bacterial growth conditions	27
3.1.3. Preparation of <i>B. anthracis</i> spore suspensions	27
3.1.4. Heat treatment of <i>B. anthracis</i> spores	28
3.1.5. Toxin expression	28

3.1.6. Capsule expression	28
3.1.7. <i>Staphylococcus aureus</i> and <i>Shigella flexneri</i> growth conditions	28
3.2. Cell based assays	29
3.2.1. Human neutrophil isolation.	29
3.2.2. Antimicrobial activity of neutrophils	29
3.2.3. LDH release assay	30
3.2.4. Killing of vegetative <i>B. anthracis</i> in the presence of serum	30
3.2.5. NADPH oxidase inhibition	31
3.2.6. Enhanced chemiluminescence	31
3.2.7. Cytochalsin D assay	31
3.2.8. Human neutrophil granule extract preparation	32
3.2.9. Bactericidal activity of hNGE and α -defensins	32
3.2.10. HPLC fraction killing	33
3.3. Analytical assays	33
3.3.1. TCA precipitation	33
3.3.2. SDS Page Gel	33
3.3.3. Western Blot	34
3.3.4. Isoelectric focusing (IEF)	35
3.3.5. Silver stain	35
3.3.6. High performance liquid chromatography (HPLC)	36
3.3.7. Immunoprecipitation	37
3.3.8. Mass spectrometry	38
3.3.9. Ionisation methods	38
3.3.9.1. Matrix assisted laser desorption ionisation (MALDI)	38
3.3.9.2. Electrospray Ionisation (ESI)	39
3.3.10. Mass analysis	39
3.3.10.1. Time of flight	39
3.3.10.2. Ion trap	39

3.3.11. Peptide mass fingerprinting (PMF)	39
3.3.12. Electron microscopy	40

4. Results

4.1. Bacteria	43
4.1.1. Spores	43
4.1.2. Vegetative bacteria	44
4.2. Neutrophils	47
4.3. Neutrophil / <i>B. anthracis</i> interaction	49
4.3.1. Neutrophil / spore interaction	49
4.3.1.1. Neutrophil killing and phagocytosis	49
4.3.1.2. Human neutrophil granule extract killing	53
4.3.1.3. Germination of spores in neutrophils	54
4.3.2. Neutrophil/ vegetative bacteria interaction	57
4.4. Analysis of anti- <i>B. anthracis</i> activity	64

5. Discussion

5.1. In vitro data	75
5.1.1. Neutrophil / spore interaction	75
5.1.2. Neutrophil / vegetative bacteria interaction	77
5.1.2.1. Effect of anthrax toxin	77
5.1.2.2. Effect of anthrax capsule	78
5.1.2.3. Comparison of intracellular and extracellular killing	80
5.1.2.4. Comparison of neutrophil and macrophage killing activity	80
5.1.2.5. Defensins	82

5.2. In vivo data	82
5.2.1. Human cases	83
5.2.2. Animal studies	84
5.3. Reasons for different neutrophil recruitment patterns	86
<u>6. Summary</u>	89
<u>7. References</u>	91
<u>8. Zusammenfassung</u>	101
