

Table of Illustrations

Fig. 1.	Location of visited sections	19
Fig. 2.	Previous paleoenvironmental reconstruction	19
Fig. 3.	General stratigraphic columns.....	20
Fig. 4.	Stratigraphic column of the studied area.....	21
Fig. 5.	Tectonic blocks of present-day eastern China	23
Fig. 6.	Geological map of Hunan, Hubei and Guizhou provinces	24
Fig. 7.	Location of the South China block in Rodinia	25
Fig. 8.	The Cambrian bioradiation	25
Fig. 9.	The agronomic revolution.....	26
Fig. 10.	Five phases of the “Snowball Earth” theory	28
Fig. 11.	Location of study area	36
Fig. 12.	Formation correlation diagram	36
Fig. 13.	Map of dominant lithologies.....	38
Fig. 14.	Thickness isopachs map	39
Fig. 15.	Stratigraphic columns of Maoping, Neo-Tianjiayuanzi, and Wuhe	42
Fig. 16.	Outcrop photographs of Dengying Formation	43
Fig. 17.	Stereogram of eight measured folds in Maoping section	44
Fig. 18.	Tectonic map	44
Fig. 19.	Outcrop photographs of high-energy facies	46
Fig. 20.	Photographs of debrites in Yangjiaping section	47
Fig. 21.	Olistostromes of Xikou section	49
Fig. 22.	Proposed paleoenvironmental reconstruction.....	51
Fig. 23.	Location of the study area	55
Fig. 24.	Previous paleoenvironmental reconstruction	55
Fig. 25.	Blocks forming present-day eastern China	56
Fig. 26.	Schematic stratigraphic column and correlation diagram	57
Fig. 27.	Photographs of peritidal and shoal facies	60
Fig. 28.	Photographs of selected shelf facies.....	62
Fig. 29.	Progradational environment during parasequence I	64
Fig. 30.	Progradational environment during parasequences II and III	65
Fig. 31.	Shallowing-upward sequences of-parasequence I.....	66
Fig. 32.	Shallowing-upward sequences of parasequences II and III.....	67
Fig. 33.	Depositional environment models	68
Fig. 34.	Correlation of seven stratigraphic sections on the shelf.....	70
Fig. 35.	Chronostratigam from the shelf sections	72
Fig. 36.	Evolution of the Yangtze platform shelf.....	74
Fig. 37.	Geographic and tectonic location of the study area	77
Fig. 38.	Paleoenvironmental reconstruction.....	78
Fig. 39.	Schematic stratigraphic column	78

Fig. 40.	Stratigraphic correlation between key sections in Hunan province.....	80
Fig. 41.	Sediment transport direction.	81
Fig. 42.	Evidence of mass wasting.....	83
Fig. 43.	Schematic ideal sequence of gravity-induced facies	84
Fig. 44.	Proposed sedimentary evolution for the allochthonous deposits.....	86
Fig. 45.	Geographic and tectonic location of the study area	89
Fig. 46.	Paleoenvironmental reconstruction.....	90
Fig. 47.	Schematic stratigraphic column	90
Fig. 48.	Correlation diagram between slope sections.	93
Fig. 49.	Photographs illustrating Facies 1	94
Fig. 50.	Photographs illustrating Facies 2	96
Fig. 51.	Evidence in thin sections of evaporite presence.....	98
Fig. 52.	Outcrop photographs of Facies 3.....	99
Fig. 53.	Stratigraphic columns of Wuhe and Xikou sections	101
Fig. 54.	Outcrop photographs of olistoliths at Xikou section	102
Fig. 55.	Relative dating of sliding	104
Fig. 56.	Evaporite-mediated brecciation.....	105
Fig. 57.	Possible mechanism and sequence of slide initiation.....	106
Fig. 58.	Synthesis of the sedimentary evolution of the Yangtze platform	109
Table 1.	Summarizing table of Ediacaran Yangtze platform facies.....	32
Table 2.	Database for drawing maps of Figs. 13 and 14	40
Table 3.	Summary table of the shelf facies.	58
Table 4.	Summary table of slope facies	82

Index of authors and sections

Standard: Author names

Numbers refer to the page number.

Italics: Section names

A

Alfaro · 39
Allen · 21, 27, 29, 57, 63
Altermann · 26
Alvarenga · 29
