

**Phylogenetic relationships of
sedentary polychaetes (Annelida)
inferred from molecular data**

Dissertation
zur Erlangung des Doktorgrades
am Fachbereich Biologie, Chemie und Pharmazie
der Freien Universität Berlin

vorgelegt von
Christoph Bleidorn
April 2004

1. Gutachter: Prof. Dr. Thomas Bartolomaeus (FU Berlin)
2. Gutachter: Prof. Dr. Günter Purschke (Universität Osnabrück)

Datum der Disputation: 16.08.2004

This dissertation is based on the following manuscripts:

Chapter 2:

BLEIDORN, C., VOGT, L. & BARTOLOMAEUS, T. (2003): A contribution to sedentary polychaete phylogeny using 18S rRNA sequence data. *Journal of Zoological Systematics and Evolutionary Research*, 41 (3): 186-195.

Chapter 3:

BLEIDORN, C., VOGT, L. & BARTOLOMAEUS, T. (2003): New insights into polychaete phylogeny (Annelida) inferred by 18S rDNA sequences. *Molecular Phylogenetics and Evolution* 29: 279-288.

Chapter 4:

STRUCK, T., BLEIDORN, C. & VOGT, L. (submitted): 18S rDNA and polychaetes. *Biological Bulletin*.

Chapter 5:

BLEIDORN, C. (submitted): Phylogenetic relationships and evolution of Orbiniidae (Annelida, Polychaeta) based on molecular data. *Zoological Journal of the Linnean Society*.

Chapter 6:

BLEIDORN, C., VOGT, L. & BARTOLOMAEUS, T. (submitted): Molecular phylogeny of lugworms (Annelida, Arenicolidae) inferred from three genes. *Molecular Phylogenetics and Evolution*.

The contributions of the different authors were as follows:

Chapter 2: I wrote the manuscript and performed all laboratory work. I analysed the data together with L. Vogt and discussed it with T. Bartolomaeus.

Chapter 3: I wrote the manuscript, analysed the data and performed all laboratory work. I discussed the results together with L. Vogt and T. Bartolomaeus.

Chapter 4: Manuscript writing, data analyses, and discussion of the results were done by all authors. T. Struck performed all laboratory work.

Chapter 6: I wrote the manuscript, analysed the data and performed all laboratory work. I discussed the results together with L. Vogt and T. Bartolomaeus.

Additional contributions by persons other than the authors are described in the Acknowledgments section of each chapter.

Ich erkläre hiermit, dass ich die vorliegende Arbeit ohne unzulässige Hilfe Dritter und ohne Benutzung anderer als der angegebenen Hilfsmittel angefertigt habe. Die aus anderen Quellen direkt oder indirekt übernommenen Daten und Konzepte sind unter Angabe der Quelle gekennzeichnet.

Die Arbeit wurde bisher weder im In- noch im Ausland in gleicher oder ähnlicher Form einer anderen Prüfungsbehörde vorgelegt.

Berlin, den

Christoph Bleidorn

Contents:

1. General Introduction	6
2. A contribution to sedentary polychaete phylogeny using 18S rDNA sequence data	9
3. New insights into polychaete phylogeny (Annelida) inferred from 18S rDNA sequences	29
4. 18S-rDNA and polychaetes	46
5. Phylogenetic Relationships and Evolution of Orbiniidae (Annelida, Polychaeta) based on Molecular Data	76
6. Molecular phylogeny of lugworms (Annelida, Arenicolidae) inferred from three genes	98
7. General Discussion	112
8. Summary	120
9. Zusammenfassung	121
10. Collected References	122
11. Curriculum Vitae	129
12. Danksagung	130
