

List of Tables

3.1	QCISD and CCSD(T), and experimental equilibrium F-F bond lengths	77
3.2	QCISD, calculated, and experimental FHF ⁻ rotational constant	77
3.3	Calculated QCISD, CCSD(T), and experimental vibrational frequencies of FHF ⁻	80
3.4	Calculated QCISD, CCSD(T), and experimental vibrational frequencies of FDF ⁻	83
3.5	The scaling factor b for isotopomers FHF ⁻ and FDF ⁻ calculated using the mass of the isomers (m), the reduced mass of the asymmetric stretching vibration (μ_{as}), and the asymmetric stretching frequency, (ν_3).	85
3.6	Frequencies and relative intensities of FHF ⁻ and FDF ⁻ IR absorption peaks obtained from the theoretical calculation and experiment.	87
3.7	2D harmonic UMP4 and UMP2, 3D MRCI, and 2D anharmonic UMP4 O-H and F-H equilibrium bond lengths	93
3.8	UMP4 and calculated OHF ⁻ rotational constant	94
3.9	2D harmonic UMP4, 2D anharmonic UMP2 and UMP4, and 3D MRCI vibrational frequencies of OHF ⁻	96
3.10	2D harmonic UMP4 and anharmonic UMP4 vibrational frequencies of ODF ⁻	99
3.11	The scaling factor b for isotopomers OHF ⁻ and ODF ⁻ calculated using the mass of the isomers (m), the reduced mass of the asymmetric stretching vibration (μ_{as}), and the asymmetric stretching frequency, (ν_3). (* Anharmonic frequencies obtained at the UMP4 level of theory.	100

3.12	Frequencies and relative intensities of OHF^- and ODF^- IR absorption peaks obtained from theoretical UMP4 calculation.	101
B.1	Twenty-six ($\Psi_0 - \Psi_{25}$) lowest 2D vibrational eigenfunctions and eigenenergies of FHF^- and FDF^- (QCISD), and of OHF^- and ODF^- (UMP4). The states and corresponding energies are labelled according to symmetric and asymmetric stretching quanta, ν_{sas} and E_{sas} , respectively. All energies are given in cm^{-1}	160
C.1	Symbols of energies and angular momenta	162
C.5	Symbols of constants	162
C.2	Symbols of functions	163
C.3	Symbols of operators and matrices	164
C.4	Symbols of variables	166
C.6	Conversion factors for energy units, adapted from Ref. [176]	167
C.7	Conversion from SI units to atomic units, adapted from Ref. [176]	167
