

Acknowledgement

The available work was made in the time (January 2003 until 2005) in the Institute of organic chemistry, Freie Universität, Berlin under the supervision of Prof. Dr. Jürgen Hinrich Fuhrhop.

My heart felt thanks go to my supervisor Prof. Dr. Jürgen - Hinrich Fuhrhop, to give me an opportunity to do doctoral degree under his supervision. During my work I enjoyed the untiring discussion with my supervisor. Many helpful advice and the moral support from Prof. Dr. Jürgen- Hinrich Fuhrhop lead to success of my dissertation work with in time.

I thank to my second supervisor Prof. Dr. Rainer Haag for helpful discussion and encouragement.

I would like to thank Priv. Doz. Dr. U. Siggel for the helpful discussion. My thanks goes to Mrs. Andrea Schulz for the transmission electron microscopy (TEM) measurements and the help rendered during my stay in laboratory.

I have benefited immensely from the advice, criticism and encouragement of colleagues Dr. Sheshanath Bhosale, Dr. T. Wang, Dr. Mrs. M. Kopaczynska. I have a word of appreciation since I interacted with them. My thanks also go to Mrs. Regina Stück for the help with my office paper work .

I would like to thank “SFB-448” and “Graduiertenkolleg 788” "H-Bonding and H-Transfer” for financial support.

I thank the ladies and gentlemen of the service department of the institute for the preparation of NMR, IR and the elemental analysis spectra, in particular the mass spectroscopy department.

Finally, and most importantly, I want to thank my family: My brothers Sheshanath, and his wife Madhuri, my wife Deepa, my younger brothers Rajesh, Devidas, Datta, sister Shobha and all of my family members. I am deeply appreciative of their patience and buoyancy. I would like to thank my son “Shivendra” for his patience during my work.
