

11. Acknowledgement

The author would like to thank the following people for their invaluable contributions to this thesis:

The members or former members of the endpoint committee of the SPR Study, Prof. Karl-Ulrich Bartz Schmidt, Prof. Norbert Bornfeld, Prof. Michael H. Foerster, Dr. Martin Hellmich, Prof. Ralf-Dieter Hilgers and Dr. Claudia Weiss for their work in designing the SPR Study, its conduction and the constructive cooperation in numerous meetings before and during the study

Dr. Claudia Weiss for her vital and selfless help in the statistical analysis of the SPR Study and especially of the Recruitment Study

Dr. Nicolas Feltgen and Prof. Sebastian Wolff for their contributions to the Recruitment Study

All surgeons and technical staff participating in the SPR Study for their input in designing the study and their contributions to the study and the recruitment list

Dr. Xiulan Zou for her contributions to the analysis of the patients treated with primary vitrectomy at the CCBF

Ms Dominique Ottenberg for her work in the organisation and conduction of the SPR Study within the CCBF

All surgeons, nurses and technical staff from the Department of Ophthalmology at the CCBF for their work in the treatment of the patients with retinal detachment and their help during the analysis of these cases

Ms Rinata Gochman for her contribution to the studies on postoperative dry eye symptoms

Prof. Michael H. Foerster, Director of the Department of Ophthalmology at the CCBF, for the motivation, encouragement and support during the creation of this thesis

My parents for their encouragement, love, support, education and the possibilities they created for me

My wife, Dr. Sarah Coupland, for her critical and loving support and her contributions to the morphological studies of postoperative conjunctival specimen
