

On the Dynamic Relations Among Multiple Goals:

Intergoal Conflict and Intergoal Facilitation
in Younger and Older Adulthood

Michaela Riediger

Dissertationsschrift zur Erlangung des Doktorgrades der
Philosophie am Fachbereich Erziehungswissenschaft, Psy-
chologie und Sportwissenschaft der Freien Universität Berlin

Berlin 2001

Gutachter:

Prof. Dr. Paul B. Baltes

Prof. Dr. Ralf Schwarzer

Disputation am 15.10.2001

TABLE OF CONTENTS

ACKNOWLEDGMENTS.....	viii
ABSTRACT	ix
ZUSAMMENFASSUNG	x
1. INTRODUCTION.....	1
<hr/>	
2. THEORETICAL CONSIDERATIONS.....	4
2.1. Goals, Action, and Development.....	4
2.2. How Does One Know a Behavior Is “Adaptive”?	8
2.3. The Model of Selection, Optimization, and Compensation	11
2.3.1. Theoretical Propositions	11
2.3.2. Empirical Evidence.....	15
2.4. Characteristics of Adaptive Goal Selection.....	18
2.4.1. Goal Content	19
2.4.2. Goal Representation	20
2.4.3. Structural Attributes of the Goal System	23
2.5. Relations Among Multiple Goals	27
2.5.1. Independence, Facilitation, and Conflict.....	27
2.5.2. Excursus: The Notion of Intraindividual Conflict.....	29
2.5.2.1. Beneficial Aspects of Intraindividual Conflict	29
2.5.2.2. Detrimental Aspects of Intraindividual Conflict	30
2.5.3. Previous Research on Intergoal Relations.....	34
2.5.3.1. Vertical Relations Within a Person’s Motivational System	34
2.5.3.2. Horizontal Relations Among a Person’s Goals.....	37
2.5.4. Implications for the Present Study.....	40
2.6. Toward an Expanded Assessment of Intergoal Relations: Potential Sources of Conflict and Facilitation	41
2.7. A Preliminary Working Model.....	45
2.8. Intergoal Relations in Younger and Older Adults	47
2.8.1. “Developmental Gain” in Adulthood	47
2.8.1.1. Theoretical Perspectives on Developmental Gain in Adulthood	48
2.8.1.2. Empirical Examples: Development of Defense Mechanisms and Coping Strategies	53
2.8.2. The Role of Social Expectations	54
2.8.3. The Role of Resource Limitations.....	55
2.9. Potential Antecedents of Intergoal Conflict.....	56
2.10. Intergoal Conflict and Adaptive Life Management.....	57
2.11. A Shared Goal: Intention to Start Regular Physical Exercise.....	62
2.11.1. Why a Shared Goal and Why this Goal?.....	62
2.11.2. Intergoal Relations in the Context of Starting to Exercise.....	63
2.12. Summary of the Theoretical Background, Research Questions, and Hypotheses	68

3.	METHOD	74
3.1.	Study Part 1: Short-Term Longitudinal Questionnaire Study.....	75
3.1.1.	Participants.....	75
3.1.2.	Procedure.....	80
3.1.3.	Measures.....	82
3.1.3.1.	Personal Goals.....	88
3.1.3.2.	The Extended Intergoal Conflict and Facilitation Questionnaire.....	90
3.1.3.3.	Hypothesized Antecedents of Intergoal Conflict.....	99
3.1.3.4.	Subjective Well-Being.....	101
3.1.3.5.	Goal Progress.....	104
3.1.3.6.	Exercise Behavior in the Study Interval.....	105
3.2.	Study Part 2: Diary Phase.....	107
3.2.1.	Participants.....	107
3.2.2.	Procedure.....	108
3.2.3.	Scale Aggregation.....	113
3.3.	Ruling Out a Methodological Concern: “Intervention Effects” of the Diary Phase?.....	115
3.4.	General Statistical Procedures.....	116
3.4.1.	Statistical Software Packages.....	116
3.4.2.	Treatment of Missing Values.....	117
3.4.3.	Variable Transformations.....	117
3.4.4.	Alpha-Level Adjustment in Multiple Testing.....	118
4.	RESULTS	119
4.1.	Study Part 1: Short-Term Longitudinal Questionnaire Study.....	119
4.1.1.	Intergoal Relations in Younger and Older Adults.....	119
4.1.1.1.	Age-Group Differences.....	120
4.1.1.2.	Correlates of Intergoal Conflict and Facilitation.....	124
4.1.1.3.	Control Analyses.....	127
4.1.1.4.	Cluster-Analytic Exploration of Age-Group Differences.....	128
4.1.2.	Intergoal Relations and Subjective Well-Being.....	134
4.1.3.	Intergoal Relations and Self-Reported Goal Progress.....	136
4.1.4.	Overview of Exercise-Specific Analyses.....	139
4.1.5.	Exercise-Specific Intergoal Conflict and Facilitation.....	140
4.1.5.1.	Age-Group Differences.....	140
4.1.5.2.	Associations With Other Exercise-Specific Person and Context Characteristics.....	141
4.1.5.3.	Control Analyses.....	144
4.1.6.	Average Exercise Frequency, Regularity, and Duration.....	146
4.1.6.1.	Age-Group Differences.....	146
4.1.6.2.	Associations With Exercise-Specific Intergoal Conflict and Facilitation.....	148
4.1.7.	Exercise Frequency over Time.....	149
4.1.7.1.	Age-Group Differences.....	150
4.1.7.2.	Associations With Exercise-Specific Intergoal Conflict and Facilitation.....	152

4.1.8.	Age-Group Differences in Exercise Adherence – A Consequence of Exercise-Specific Intergoal Relations?	154
4.1.9.	Summary of Results in Study Part 1.....	156
4.2.	Study Part 2: Diary Phase	159
4.2.1.	Intergoal Relations and Emotional Well-Being in Everyday Life	159
4.2.2.	Intergoal Relations and the Tendencies to Enjoy and Dislike Everyday Activities	160
4.2.3.	Intergoal Relations and the Enjoyment of Goal Pursuit.....	162
4.2.4.	Intergoal Relations and the Experience of Situational Conflict	167
4.2.5.	Intergoal Relations and the Involvement in Activities Furthering and Hindering Goal Pursuit.....	168
4.2.6.	Did Situational Conflict and Goal Involvement Mediate the Relationship between Intergoal Relations and Emotional Well-Being?.....	171
4.2.6.1.	Situational Conflict and Goal Involvement as Predictors of Short-Term Affect.....	172
4.2.6.2.	Mediation Analyses on the Person Level	177
4.2.7.	Summary of Results in Study Part 2.....	179
4.2.8.	Overview of Hypotheses and Main Results.....	180
5.	DISCUSSION	183
5.1.	The Independence of Intergoal Conflict and Facilitation	184
5.2.	Intergoal Relations in Younger and Older Adults	186
5.3.	Intergoal Relations and Adaptive Life Management.....	190
5.3.1.	Psychological Well-Being.....	191
5.3.2.	Everyday Behavior and Experiences.....	194
5.3.3.	Longer Term Goal Progress.....	198
5.3.4.	Exercise Adherence	199
5.3.5.	Age-Group Differences in Exercise Adherence	202
5.4.	Conclusions.....	203
5.5.	Outlook.....	205
6.	REFERENCES	207
7.	APPENDICES	223
7.1.	Appendix A: Additional Information on Instruments in Study Part 1	224
7.2.	Appendix B: Description of Variables in Study Part 1	247
7.3.	Appendix C: Age-Group Differences in Intergoal Conflict and Facilitation After Excluding the Exercise Goal.....	256
7.4.	Appendix D: Additional Control Analyses in Study Part 1.....	259

Table 44.	<i>Summary of Hypotheses and Results</i> _____	180

LIST OF BOXES AND TABLES IN APPENDICES

Appendix A: Additional Information on Instruments in Study Part 1

Box A 1.	<i>Three Personal Goals Besides Exercising: Instruction</i> _____	224
Box A 2.	<i>General Instruction for Self-Report of Monthly Exercise Behavior</i> _____	242
Table A 1.	<i>Item Characteristics of the Extended Intergoal Conflict and Facilitation Questionnaire in the Total Sample and the Younger and Older Subsamples</i> _____	225
Table A 2.	<i>Description of the Intergoal Conflict and Facilitation Subscales in the Total Sample and the Subsamples of Younger and Older Adults</i> _____	239
Table A 3.	<i>Items Assessing Habitual Strategies in Managing Multiple Goals</i> _____	239
Table A 4.	<i>Description of Items Assessing Habitual Strategies in Managing Multiple Goals</i> _____	241
Table A 5.	<i>Habitual Strategies in Managing Multiple Goals: Subscale Correlations (Pearson's)</i> _____	241
Table A 6.	<i>Resource Intensity of the Four Goals under Study: Subscale Correlations (Pearson's)</i> _____	241
Table A 7.	<i>Pearson's Correlations among Facets of the Multidimensional Affect Rating Scale at T1 and T2</i> _____	242
Table A 8.	<i>Additional and Control Variables in Study Part 1</i> _____	243

Appendix B: Description of Variables in Study Part 1

Table B 1.	<i>Description of Intergoal Conflict and Facilitation Subscales in Younger and Older Adults</i> _____	247
Table B 2.	<i>Description of Intergoal Conflict and Facilitation Composite Scales in Younger and Older Adults</i> _____	247
Table B 3.	<i>Description of Potential Correlates of Intergoal Conflict and Facilitation in the Total Sample, the Subsamples of Younger and Older Adults, and Tests for Age-Group Mean Differences</i> _____	248
Table B 4.	<i>Subjective Well-Being at T1 and T2: Description of Data Distributions in the Total Sample, the Subsamples of Younger and Older Adults, and Tests for Age-Group Mean Differences</i> _____	250
Table B 5.	<i>Pearson's Correlations Among Facets of Subjective Well-Being at T1 (Above Diagonal) and T2 (Below Diagonal)</i> _____	251
Table B 6.	<i>Self-Reported Goal Progress at T2: Description of Data Distributions in the Total Sample, the Subsamples of Younger and Older Adults, and Tests for Age-Group Mean Difference</i> _____	251
Table B 7.	<i>Description of Exercise-Specific Intergoal Conflict and Facilitation at T1 in the Total Sample and in the Subsamples of Younger and Older Adults</i> _____	252
Table B 8.	<i>Description of Potential Correlates of the Exercise-Specific Intergoal Conflict and Facilitation Composites in the Total Sample, the Subsamples of Younger and Older Adults, and Tests for Age-Group Mean Differences</i> _____	252
Table B 9.	<i>Exercise Participation in the Study Interval: Variable Descriptions in the Total Sample and the</i>	

	<i>Younger and Older Subsamples</i> _____	254
Table B 10.	<i>Pearson Correlations of Mean Self-Reported Exercise Duration, Regularity, and Frequency (T2) in the Total Sample (N = 142)</i> _____	255

Appendix C: Replication of Age Group Differences in Goal Conflict and Facilitation after Exclusion of the Exercise Goal

Table C 1.	<i>Distribution of Intergoal Conflict and Facilitation Subscales in Subsamples of Younger and Older Adults after Exclusion of Exercise-Specific Responses</i> _____	256
Table C 2.	<i>Differences in Subscale Mean Endorsements in the Younger (Above Diagonal) and Older (Below Diagonal) Subsamples: Significance of Paired-Sample t Tests</i> _____	257
Table C 3.	<i>Univariate Follow-Up Analyses of Age-Group Differences in Mean Scores of the Intergoal Conflict and Facilitation Subscales</i> _____	257
Table C 4.	<i>Description of the Intergoal Conflict and Facilitation Composite Scales in the Younger and Older Subsamples</i> _____	258

Appendix D: Additional Control Analyses in Study Part 1

Table D 1.	<i>Control Analyses for the Relations Between Intergoal Conflict and Facilitation and Several Indicators of Subjective Well-Being in Study Part I: Partial Correlations and R²-Change</i> _____	259
Table D 2.	<i>Control Analyses for the Relation Between Exercise-Specific Intergoal Conflict and Facilitation and the Average Exercise Participation During the Study Interval: Sequential (Hierarchical) Multiple Regression</i> _____	262

Appendix E: Description of Variables in Study Part 2

Table E 1.	<i>Description of the Intergoal Conflict and Facilitation Composites (T1) and Subjective Well-Being Indicators in the Total Sample (N = 81), the Subsamples of Younger (n = 52) and Older Adults (n = 29), and Tests for Age-Group Mean Differences</i> _____	266
Table E 2.	<i>Description of Situational Conflict Variables in the Total Sample, the Subsamples of Younger and Older Adults, and Tests for Age-Group Mean Differences</i> _____	267
Table E 3.	<i>Description of Engagement in (Positive and Negative) Goal-Relevant Activities in the Total Sample, the Subsamples of Younger and Older Adults, and Tests for Age-Group Mean Differences</i> _____	267
Table E 4.	<i>Description of Average Enjoyment of Pursuing Personal Goals and Tests for Age-Group Mean Differences: Level of Analysis – Single Reported Goal (N_{total} = 316, n_{younger} = 201, n_{older} = 115)</i> _____	268
Table E 5.	<i>Description of Short-Term Emotional Well-Being, Goal Involvement, and Situational Conflict, and Tests for Age-Group Mean Differences: Level of Analysis – Single Diary Entry (N_{total} = 2,243, n_{younger} = 1,426, n_{older} = 817)</i> _____	269

Appendix F: Additional Control Analyses in Study Part 2

Table F 1.	<i>Description of Control Variables in the Diary Study, and Tests for Age-Group Mean Differences</i> _____	270
Table F 2.	<i>Control Analyses for the Relations Between the Intergoal Conflict and Facilitation Composites and Several Indicators of Subjective Well-Being in the Diary Study: Partial Correlations and R²-Change</i> _____	271
