

Retrieval induced consolidation processes in the  
honeybee, *Apis mellifera*

Dissertation zur Erlangung des akademischen Grades des  
Doktor der Naturwissenschaften (Dr. rer. nat.)

eingereicht am Fachbereich Biologie, Chemie, Pharmazie  
der Freien Universität Berlin

vorgelegt von

NICOLA STOLLHOFF

aus Berlin

November 2005

1. Gutachter: Prof. Dr. Randolph Menzel

2. Gutachter: Prof. Dr. Dietmar Kuhl

Disputation am 06.12.2005

Chapter II of the dissertation based on the following manuscript:

N. Stollhoff, R. Menzel and D. Eisenhardt (2005):

Spontaneous Recovery from Extinction Depends on the Reconsolidation of the Acquisition Memory in an Appetitive Learning Paradigm in the Honeybee (*Apis mellifera*). *Journal of Neuroscience*, 25(18): 4485-4493

The contributions of the different authors were as follows:

I performed all experiments and data analyses, wrote the manuscript under the guidance of D. Eisenhardt and discussed it with D. Eisenhardt and R. Menzel.

# Contents

1	General Introduction.....	3
2	Chapter I .....	11
	The Reconsolidation process in the honeybee .....	
2.1	Introduction.....	11
2.2	Methods.....	13
2.3	Results .....	16
2.4	Discussion.....	26
3	Chapter II.....	34
	Spontaneous recovery resembles reconsolidation.....	
3.1	Introduction.....	34
3.2	Methods.....	35
3.3	Discussion.....	49
4	Chapter III .....	54
	The influence of reward duration on consolidation of extinction memory.....	
4.1	Introduction.....	54
4.2	Methods.....	56
4.3	Results .....	59
4.4	Discussion.....	63
5	General Discussion.....	66
6	Summary.....	71
7	Zusammenfassung: .....	73
8	Acknowledgements.....	77
9	References .....	79
