Acknowledgements

This thesis is a result of my work as a research associate at the German Institute for Economic Research (DIW), Berlin.

The idea for the project was suggested by various projects done for the Senate Department of Economics, Labour and Women's Issues and the Department of Science, Research and Culture of the Berlin Senate, by both the European Regional Development Fund-sponsored projects of the districts Mitte and Pankow in Berlin and the Cultural Project of the Professional Association of Berlin Artists Ltd..

I would like to thank the many people who helped me in different ways to succeed in finishing this work.

First and foremost, I would like to thank Prof. Dr. Gerhard Braun for his professional advice, his helpful comments and his kind assistance throughout the writing process.

I am also grateful to PD Dr. Björn Frank, a former colleague at the DIW Berlin, for the interest he demonstrated in the project and for *acting as co-operating evaluator*.

I would like to use the opportunity to also thank him for the interesting and extremely instructive years that we worked together. Those years have been a major influence on my work and have laid the foundation for my professional future.

Vital editorial assistance came from my friends. Particular acknowledgements go to Stacie Graham for her invaluable help with the manuscript and her friendly encouragement throughout the overall process. I would like to thank Wencke Hertzsch, Michaela Daub, Sushmita Swaminathan, Dr. Christa Juretzka, Florian Schöttle and Matthias Naumann for helpful feedback and critical comments, Hella Steinke and Ayse Gökmenöglu for editorial help.

Most important, I am grateful to my family, especially to my partner Antje and my son Oskar, for their constant support during the final phase of my dissertation.
