

# **The role of the small GTPase Ran in assembly of a bipolar mitotic spindle**

**Dissertation**

Fachbereich  
Biologie, Chemie, Pharmazie  
der Freien Universität Berlin

vorgelegt von  
Christoph Schatz  
aus Berlin

2003

Aus dem  
Europäischem Laboratorium für Molekularbiologie  
Heidelberg  
Abteilung Gene Expression  
Leiter: Dr. Iain Mattaj

Erstgutachter: Dr. Jain Mattaj

Zweitgutachter: Prof. Dr. Ralf Erdmann

Tag der Disputation: 12. Mai 2003

# Table of Contents

<b>Summary</b>	<b>1</b>
<b>Zusammenfassung</b>	<b>3</b>
<b>Abbreviations</b>	<b>5</b>
<b>Table of Contents</b>	<b>6</b>
<b>Introduction</b>	<b>9</b>
<b>Cell division</b>	<b>9</b>
<b>The <i>Xenopus laevis</i> extract system and the cell cycle</b>	<b>11</b>
<b>The mitotic spindle</b>	<b>13</b>
Microtubules and dynamic instability	13
<b>Centrosomes</b>	<b>16</b>
MAPs and spindle dynamics	17
<b>Regulation of MAPs and motor proteins</b>	<b>18</b>
<b>Spindle Bipolarity</b>	<b>22</b>
<b>Forming a spindle</b>	<b>25</b>
<b>The chromatin effect</b>	<b>26</b>
<b>Nuclear-cytoplasmic transport</b>	<b>27</b>
<b>Ran's function in spindle formation</b>	<b>32</b>
<b>Aim of the project</b>	<b>37</b>
<b>Results</b>	<b>39</b>
<b>Investigating the role of transport receptors in Ran induced microtubule assembly</b>	<b>39</b>
Ran induces MT assembly by reversing the inhibition by importin	44
Purification of the Ran dependent nucleation activity	46
TPX2 induces microtubule assembly in <i>Xenopus</i> M-phase extracts	48
TPX2 is required for chromatin induced spindle assembly	51
Analyzing TPX2 induced aster formation	54

TPX2 binds importin directly _____	57
TPX2 has one critical binding site for importin _____	58
TPX2 induces aster seed formation through microtubule nucleation and bundling _____	66
Differential regulation of the nucleation and bundling activities of TPX2 by importin _____	68
Ran induced spindle organization is a two step mechanism _____	72
TPX2 is necessary for Ran induced centrosome activation _____	75
Ran impairs spindle formation in <i>Drosophila melanogaster</i> _____	81
<b>Discussion</b> _____	<b>84</b>
<b>A message from chromatin</b> _____	<b>84</b>
<b>TPX2 and importin <math>\alpha</math> interaction</b> _____	<b>86</b>
<b>The mechanism of TPX2 action in microtubule assembly</b> _____	<b>88</b>
<b>TPX2, the target of Ran in MT nucleation</b> _____	<b>91</b>
<b>Regulation of TPX2 by importin <math>\alpha</math></b> _____	<b>92</b>
<b>Ran induced spindle organization</b> _____	<b>95</b>
<b>TPX2 in centrosome activation</b> _____	<b>96</b>
<b>Ran impairs spindle formation in <i>Drosophila melanogaster</i></b> _____	<b>97</b>
<b>Material and Methods</b> _____	<b>98</b>
<b>Chemicals</b> _____	<b>98</b>
<b>Commonly used buffers, solutions and media</b> _____	<b>102</b>
<b>Commonly used materials</b> _____	<b>106</b>
<b>Methods</b> _____	<b>107</b>
Nucleoplasmin binding assay _____	107
<i>Xenopus laevis</i> M-phase extract preparation _____	108
Microtubule assembly assay in <i>Xenopus</i> M-phase extracts _____	108
Depletion and reactivation of <i>Xenopus</i> M-phase extracts _____	109
Immunodepleting TPX2 _____	109
Cloning of TPX2 expression constructs _____	110
Expression and purification of recombinant proteins _____	110
Preparation of chromatin beads _____	111
Assays for <i>in vitro</i> microtubule assembly _____	111
Microtubule co-pelleting assay _____	112

## Zusammenfassung

---

Electron Microscopy _____	113
Western blotting and antibodies _____	113
Activation and re-purification of sperm centrosomes _____	113
<i>Drosophila</i> embryo injection _____	114
<b><i>Bibliography</i></b> _____	<b>115</b>
<b><i>Acknowledgments</i></b> _____	<b>135</b>
<b><i>Publications</i></b> _____	<b>137</b>
<b><i>Curriculum vitae</i></b> _____	<b>138</b>
PRESENT ADDRESS _____	138
EDUCATION _____	138
RESEARCH EXPERIENCE _____	138
FELLOWSHIPS _____	139
