

## CONTENTS

<b>1</b>	<b>Introduction and the objectives of the study.....</b>	<b>1</b>
<b>2</b>	<b>Literature review.....</b>	<b>4</b>
<b>2.1</b>	<b>The physiological and pathological consideration of acid-base homeodynamics..</b>	<b>4</b>
2.1.1	Intracellular and extracellular buffers .....	6
2.1.2	The role of the respiratory system in acid-base homeodynamics .....	7
2.1.3	The role of the kidneys in acid-base homeodynamics .....	8
2.1.4	The role of the gastrointestinal tract and the liver in acid-base homeodynamics .....	11
<b>2.2</b>	<b>Clinical assessment of acid-base status.....</b>	<b>12</b>
2.2.1	Henderson-Hasselbalch approach .....	12
2.2.2	Physicochemical approaches.....	13
2.2.2.1	The strong ion approach (Stewart's strong ion model).....	13
2.2.2.2	The simplified ion model .....	14
2.2.3	Measurements of unmeasured strong anions in the plasma .....	16
2.2.3.1	Anion gap .....	16
2.2.3.2	Strong anion gap (SIG) .....	17
2.2.3.3	Base excess (BE) .....	17
2.2.3.3	Total CO <sub>2</sub> concentration.....	18
<b>2.3</b>	<b>Factors that influence acid-base status.....</b>	<b>19</b>
2.3.1	Effect of sex, age and physical treatment.....	19
2.3.2	Effect of diet composition .....	19
2.3.3	Effect of clinical and environmental conditions .....	20
2.3.4	Effect of therapeutic solutions infusion .....	20
<b>2.4</b>	<b>Acid-base disturbances .....</b>	<b>21</b>
2.4.1	Metabolic acidosis and alkalosis .....	21
2.4.2	Respiratory acidosis and alkalosis.....	22
<b>2.5</b>	<b>Renal response to acid-base disturbances .....</b>	<b>23</b>
<b>2.6</b>	<b>Physiological characteristics of the camel .....</b>	<b>24</b>
<b>2.7</b>	<b>Acid-base physiology of the camel .....</b>	<b>26</b>
<b>3</b>	<b>Materials and Methods .....</b>	<b>28</b>
<b>3.1</b>	<b>Experimental animals .....</b>	<b>28</b>
	The calves.....	28
	The young camels.....	28
<b>3.2</b>	<b>Housing and management .....</b>	<b>29</b>
<b>3.3</b>	<b>Induction of the experimental metabolic acidosis .....</b>	<b>29</b>
<b>3.4</b>	<b>Clinical examination .....</b>	<b>29</b>
<b>3.5</b>	<b>Samples collection .....</b>	<b>30</b>
	Blood collection .....	30
	Urine collection .....	30
<b>3.6</b>	<b>Samples analysis .....</b>	<b>30</b>

Blood gas analysis.....	30
Serum analysis.....	30
Serum osmolality.....	30
<b>3.7 SID<sub>3</sub> and [A<sub>tot</sub>] calculation .....</b>	<b>31</b>
<b>3.8 Urine analysis.....</b>	<b>31</b>
Urine pH.....	31
Urine osmolality .....	31
Fractional excretion of electrolytes .....	31
<b>3.9 Statistical analysis .....</b>	<b>32</b>
<b>4. Results .....</b>	<b>33</b>
<b>4.1 The calves .....</b>	<b>33</b>
<b>4.1.1 Clinical parameters .....</b>	<b>33</b>
Respiratory rate (RR) .....	33
Heart rate (RR) .....	34
<b>4.1.2 Blood haematocrit (Hct) .....</b>	<b>35</b>
<b>4.1.3 Serum parameters .....</b>	<b>36</b>
Serum- [Na <sup>+</sup> ]. .....	36
Serum- [K <sup>+</sup> ] .....	37
Serum- [Cl <sup>-</sup> ].....	38
Serum- [Pi] .....	39
Serum- [Protein].....	40
Serum- [Ablumin] .....	41
Serum osmolality.....	42
<b>4.1.4 Acid-base parameters .....</b>	<b>43</b>
<b>Henderson- Hasselbalch variables .....</b>	<b>43</b>
Blood pH.....	43
Blood P <sub>CO2</sub> .....	44
Blood- [HCO <sub>3</sub> <sup>-</sup> ] .....	46
Blood- [BE] .....	47
The relationship between venous blood pH and Henderson-Hasselbalch variables ...	48
<b>Stewart's variables .....</b>	<b>50</b>
Blood P <sub>CO2</sub> .....	50
Serum- [SID <sub>3</sub> ].....	50
Serum- [A <sub>tot</sub> ] .....	52
The relationship between venous blood pH and Stewart's variables.....	53
<b>4.1.5 Urine parameters.....</b>	<b>55</b>
Urine pH.....	55
Urine osmolality .....	55
Fractional excretion of electrolytes .....	56
<b>4.2 The young camels .....</b>	<b>59</b>
<b>4.2.1 The control data .....</b>	<b>59</b>
<b>4.2.2 Clinical parameters of the experimental young camels.....</b>	<b>60</b>

Respiratory rate (RR) .....	60
Heart rate (HR) .....	61
<b>4.2.3 Blood haematocrit (Hct) of the experimental young camels .....</b>	<b>62</b>
<b>4.2.4 Serum parameters of the experimental young camels.....</b>	<b>63</b>
Serum- $[Na^+]$ .....	63
Serum- $[K^+]$ .....	64
Serum- $[Cl^-]$ .....	65
Serum- $[Pi]$ .....	66
Serum- [Protein].....	67
Serum- [Albumin]. .....	68
Serum osmolality.....	69
<b>4.2.5 Acid-base parameters of the experimental young camels .....</b>	<b>70</b>
<b>Blood pH.....</b>	<b>70</b>
<b>Stewart's variables .....</b>	<b>71</b>
Serum- $[SID_3]$ .....	71
Serum- $[A_{tot}]$ .....	74
The relationship between venous blood pH and Stewart's variables.....	75
<b>4.2.6 Urine parameters of the experimental young camels .....</b>	<b>77</b>
Urine pH.....	77
Urine osmolality .....	77
Fractional excretion of electrolytes .....	78
<b>5 Discussion.....</b>	<b>80</b>
<b>5.1 Response of clinical parameters to the experimentally metabolic acidosis .....</b>	<b>80</b>
<b>5.2 Response of blood Hct to the experimentally metabolic acidosis.....</b>	<b>80</b>
<b>5.3 Response of serum parameters to the experimentally metabolic acidosis .....</b>	<b>82</b>
<b>5.4 Response of Acid-base parameters to the experimentally metabolic acidosis.....</b>	<b>85</b>
<b>5.6 Response of urine parameters response to the experimentally metabolic acidosis....</b>	<b>90</b>
<b>5.7 General conclusions .....</b>	<b>93</b>
<b>6 Summary .....</b>	<b>96</b>
<b>7 Zusammenfassung.....</b>	<b>98</b>
<b>8 References .....</b>	<b>100</b>
<b>9 Appendixes.....</b>	<b>116</b>
<b>10 Acknowledgements.....</b>	<b>118</b>
<b>Selbstständigkeitserklärung.....</b>	<b>119</b>
