

Regulation of expression of the intestinal MUC2 gene *in vitro* and *in vivo*

Dissertation

zur
Erlangung des Doktorgrades des
Fachbereichs Biologie, Chemie, Pharmacie
der Freien Universität Berlin

Vorgelegt von Alexei Gratchev geboren in Moskau, Rußland

2001

Committee in charge:

Prof. Dr. E. Riedel
Prof. Dr. C.Hanski

Date of thesis defense: 9.08.2001

To N.P.K. Isseljova, my first Teacher

Table of Contents

TABLE OF CONTENTS	4
ACKNOWLEDGMENTS	7
SUMMARY	8
1 INTRODUCTION	10
1.1 Colon carcinoma	10
1.1.1 Genetic alterations during colon carcinogenesis	10
1.1.2 Mucinous colon carcinoma	11
1.2 DNA methylation	13
1.2.1 Function of DNA methylation in prokaryotes	14
1.2.2 Differences of DNA methylation between eukaryotes and prokaryotes	14
1.2.3 Regulation of DNA methylation in eukaryotic cell	15
1.2.4 CpG islands	16
1.2.5 Regulation of transcription by methylation	17
1.3 Role of DNA methylation in cancer	18
1.3.1 Methylation dependent mutations	18
1.3.2 Overall decrease of DNA methylation in cancer cells	19
1.3.3 Regional hypermethylation in cancer	20
2 OBJECTIVES OF THIS WORK	23
3 MATERIALS AND METHODS	24
3.1 Tissue samples	24
3.1.1 Preparation of the sections for microdissection	24
3.1.2 Microdissection	24
3.2 Cell lines	25
3.3 Chemicals and products for molecular biology	25
3.3.1 Buffers and mediums	25
3.3.2 Kits	26
3.3.3 Restriction enzymes	26
3.3.4 DNA modifying enzymes	26
3.3.5 Primers and oligonucleotides	27
3.3.5.1 Primers for PCR	27
3.3.5.1.1 MUC2 cDNA	27
3.3.5.1.2 MUC2 promoter region	27
3.3.5.1.3 MUC2 first intron region	27
3.3.5.1.4 Bisulphite modified MUC2 promoter sequence	28
3.3.5.1.5 DNMT2 methyltransferase (Acc. Nr.: AF045888)	28
3.3.5.1.6 Maintenance Methyltransferase DNMT1 (Acc. Nr.: X63692)	29
3.3.5.1.7 p21waf (Acc. Nr.: U03106)	29
3.3.5.1.8 PDH (Acc. Nr.: D90086)	29

3.3.5.2	Standard sequencing primers -----	29
3.3.5.3	Primers for Single Nucleotide Primer Extension (SNUPE) -----	30
3.3.6	Polymerase chain reaction (PCR) -----	30
3.3.6.1	PCR for MUC2 expression analysis -----	31
3.3.6.2	MUC2 promoter region -----	31
3.3.6.3	PCR of the first intron of MUC2 -----	31
3.3.6.4	PCR of bisulphite treated DNA isolated from cell lines -----	32
3.3.6.5	PCR of the bisulphite treated DNA from sections -----	33
3.3.6.6	PCR of DNMT2 methyltransferase -----	34
3.3.6.7	PCR of DNMT1 methyltransferase -----	35
3.3.6.8	PCR of bisulphite treated plasmid DNA -----	35
3.3.6.9	PCR for site directed mutagenesis in the promoter region -----	36
3.3.7	Probes for Northern and Southern blots -----	36
3.3.7.1	Northern blot of MUC2 -----	36
3.3.7.2	Southern blot of MUC2 -----	36
3.3.7.3	Oligonucleotide of first 30 bp of MUC2 gene -----	37
3.3.7.4	18S rRNA -----	37
3.3.7.5	p21 probe -----	37
3.3.7.6	Luciferase gene probe -----	37
3.3.8	Plasmid vectors -----	37
3.3.9	Bacteria -----	38
3.3.10	Genomic library -----	38
3.4	Methods of λ phage analysis -----	38
3.4.1	Plating the phage -----	38
3.4.2	Titration of phage stock -----	38
3.4.3	PCR based screening of λ DNA library -----	38
3.4.4	High titer stock preparation -----	42
3.4.5	Large scale phage DNA preparation -----	42
3.5	Plasmids preparations -----	43
3.5.1	Transformation of E.coli -----	43
3.5.2	Minipreps -----	44
3.5.3	Midipreps -----	44
3.5.4	Isolation of DNA fragments from the agarose gel -----	44
3.5.5	Cloning of the DNA fragment into the plasmid vector -----	45
3.5.6	Cloning of the PCR product in TOPO TA Cloning vector -----	45
3.6	Analysis of genes expression -----	45
3.6.1	Total RNA isolation -----	45
3.6.2	Northern blot -----	46
3.6.2.1	Preparation of the gel -----	46
3.6.2.2	Transferring the RNA on the membrane -----	46
3.6.2.3	Labelling of the probe -----	46
3.6.2.4	Hybridisation of the membrane -----	46
3.6.3	RT-PCR -----	47
3.6.3.1	cDNA synthesis -----	47
3.7	Analysis of DNA methylation -----	48
3.7.1	Southern blot -----	48
3.7.2	Analysis of methylation by bisulphite sequencing -----	49
3.7.3	Analysis of methylation by SNUPE -----	49
3.7.4	Inhibition of methylation with 5-aza-2'-deoxycytidine -----	52
3.8	Reporter analysis of the promoter activity -----	52
3.8.1	In vitro methylation -----	52
3.8.2	Transfection of cells -----	52

3.8.3	Luciferase and β -galactosidase assays-----	52
3.8.4	Normalising the transfection with DOT blot hybridisation -----	53
4	RESULTS-----	54
4.1	Isolation and characterisation of the MUC2 promoter -----	54
4.1.1	MUC2 5' region containing lambda clone-----	54
4.1.2	Sequencing and analysis of the promoter region-----	60
4.1.3	Analysis of the regulation of the MUC2 promoter -----	62
4.2	Methylation of the promoter in different cell lines-----	66
4.2.1	MUC2 promoter methylation in MUC2 expressing and non expressing cell lines -----	66
4.2.2	Analysis of MUC2 promoter methylation by bisulphite sequencing-----	71
4.2.3	Activation of MUC2 expression by inhibition of methylation -----	73
4.3	MUC2 promoter methylation in cloned cells-----	75
4.3.1	Inhibition of methylation and selection of clones-----	75
4.3.2	Methylation of the MUC2 promoter in obtained clones -----	77
4.3.3	Gene expression alterations in clones-----	80
4.4	Influence of the site-specific methylation influence on the promoter activity-----	82
4.4.1	Influence of methylation on the promoter activity in different cell lines -----	82
4.4.2	Analysis of the effect of mutations at CpG sites #5 and #8-----	84
4.4.3	Analysis of possible <u>de novo</u> methylation or demethylation of the transfected plasmid -----	85
4.5	MUC2 promoter methylation in tissues-----	86
4.5.1	Application of microdissection-----	86
4.5.2	Analysis of MUC2 promoter methylation in tissue -----	87
4.5.3	MUC2 promoter methylation in isolated goblet cells -----	88
5	DISCUSSION-----	90
5.1	MUC2 promoter sequence analysis -----	90
5.2	Regulation of MUC2 expression in cell lines.-----	91
5.3	Regulation of MUC2 expression in malignant and normal colonic tissues -----	94
5.4	The role of methylation in the development of the mucinous carcinoma-----	97
6	REFERENCE LIST -----	99
	CURRICULUM VITAE-----	109
