c "+" orientation unambiguously determined, whereas "-" indicates unsure orientation of the Chla.

## Acknowledgment

Many people supported me during the completion of this thesis with helpful assistance and constructive criticism.

First of all I wish to express my sincere gratitude to Prof Wolfram Saenger, who gave me the opportunity to work on this interesting project and his constant support. He provided me with all necessary equipment and gave me the possibility to present my results on international conferences.

I am grateful to Dr Jacek Biesiadka who guided this work and helped whenever it was in need. I could learn lot of new things not only related to X-ray crystallography and he was a perfect colleague for the extended days at the synchrotrons across Europe.

I am also indebted to my Diploma student Gisa Gerold for her work on PsbO and to my apprentice André Chieduch for his technical support.

I want to thank all members of the Saenger group for their support. I thank Claudia Alings for her help in the crystallization of various proteins. Furthermore I would like to thank Dr Chrisine Kozerski, Dr Norbert Krauss, Dr Anton Meinhart, Dr Patrick Jordan, Dr Timm Maier and Wilhelm Weihofen for the enjoyable atmosphere in the lab.

This work benefited from the PSII purifications done at the Technical University in the group of Drs Athina Zouni, Klaus Irrgang and Jan Kern under the technical assistance of Dörte DiFiore and Claudia Lüneberg.

I am grateful to Prof W. Knapp and Hiroshi Ishikita as well as to Prof A. Scherz and Ilan Samish for the fruitful cooperation during the last years

I highly appreciate the competent help at the beamlines of ESRF (Grenoble, France), SLS (Villigen, Switzerland), BESSY (Berlin, Germany) and DESY (Hamburg, Germany).

I would like to express my deepest gratitude for the constant support, understanding and humour to Żaneta Zaborowska.

Finally I wish to thank my family who have been generous with their encouragement throughout my study time.

# **Curriculum vitae**

Name:Bernhard LollDate of birth:January 24, 1974Place of birth:Ravensburg, GermanyNationality:German

- Jul 2003 Cooperation with Professor A. Ziegler from the Charité (Humboldt University Berlin) to elucidate the crystal structures of different Human Leukocyte Antigen (HLA) molecules in complex with peptides.
- Dec 2000 Beginning of the PhD thesis on "Crystal Structure of Photosystem II from the Cyanobacterium *Thermosynechococcus elongatus* at 3.2 Å Resolution" in the group of Professor W. Saenger at the Free University of Berlin. Employed as research fellow in the frame of the Sonderforschungsbereich 498 "Protein-Kofaktor Wechselwirkungen in biologischen Prozessen".
- Oct 2000 Diploma thesis on "Generation and crystallisation of surface mutants of "6-Hydroxy-D-Nicotine-Oxidase from *Arthrobacter nicotinovorans* and Characterisation and crystallisation of a Pyranose-Oxidase from *Peniophora gigantea*" in the group of Professor G. E. Schulz at the Albert-Ludwigs University of Freiburg, Germany.

Dec 1999 Diploma exam in chemistry in the topics, physical chemistry, organic chemistry, inorganic chemistry and the main emphasis in biochemistry at the University of Freiburg; grade 2 ("good")

- Apr 1996 Vordiploma exam in chemistry in the topics organic chemistry, inorganic chemistry, physical chemistry and physics; grade 2 ("good")
- Oct 1994 Study of chemistry at the Albert-Ludwigs University of Freiburg, Germany

Jul 1993 Compulsory community service; giving care of elder and handicapped people

May 1993 Abitur degree (A-level) at the Gymnasium Weingarten, Germany; grade 2.2 ("good")
