

Aus der Medizinischen Klinik des St. Hedwig Krankenhauses
Akademisches Lehrkrankenhaus der Medizinischen Fakultät
Charité - Universitätsmedizin Berlin

DISSERTATION

**Growth and differentiation control in the
thyroid: all ways leading to CREB ?**

zur Erlangung des akademischen Grades
Doctor medicinae (Dr. med.)

vorgelegt der Medizinischen Fakultät
Charité – Universitätsmedizin Berlin

von

Astrid C. S. Sobke

aus Gelsenkirchen

Gutachter: 1. Prof. Dr.med. K.-M. Derwahl
2. Prof. Dr. med. K. Badenhoop
3. Prof. Dr. med. J. Hensen

Datum der Promotion: 07.12.2007

Contents

1. INTRODUCTION	1
2. MATERIALS AND METHODS	16
2.1. Cell Culture	16
2.1.1. Cell Lines	16
2.1.2. Isolation of Thyroid Primary Cells	17
2.2. Western Blotting	18
2.2.1. Preparation of Total Protein Lysate	18
2.2.2. Determination of Protein Concentration	19
2.2.3. SDS-PAGE	20
2.2.4. Semi-dry Blotting	21
2.2.5. Immunodetection	21
2.3. Polymerase Chain Reaction (PCR)	23
2.3.1. RNA Isolation	23
2.3.2. Reverse Transcription	24
2.3.3. ICER-PCR	24
2.4. Reporter Gene Assay	25
2.4.1. Transformation of <i>E. coli</i> with Plasmid DNA	25
2.4.2. Isolation of Plasmid DNA for Transfection Experiments	26
2.4.3. Transient Transfection of HTC-TSHr Cells	26
2.4.4. Luminometric Measurement of Reporter Gene Activity	27
3. RESULTS	28
3.1. Demonstration of Expression and Phosphorylation of CRE-binding proteins in Thyroid Cells by Western-blot Analysis	28
3.2. TSH induces CRE-binding Protein Phosphorylation in a Dosage- and Time- dependent Manner	30
3.3. Dosage- and Time-dependent Phosphorylation upon Stimulation with Tyrosine Kinase Receptor Agonists EGF and Insulin	33
3.4. Comparison of CRE-binding Protein Phosphorylation Patterns in Thyroid Primary Cells with those in Thyroid Carcinoma Cell Lines	34
3.5. CREB/M-phosphorylation in “Cold” and “Hot” Nodules	36
3.6. Study of Pathwas Employed in CREB/M-phosphorylation with Various Kinase Inhibitors	37

3.6.1. Influence of Kinase Inhibitors on TSH- and Insulin-dependent Phosphorylation	38
3.6.2. Influence of Kinase Inhibitors on EGF- and TPA-induced Phosphorylation	39
3.7. ICER-expression in Thyrocytes	40
3.8. Transient Transfection Studies with the CRE-reporter Plasmid 4xSCE1/2T81 in HTC-TSHr Cells	41
3.8.1. Induction of CRE-controlled Luciferase by Forskolin and TPA	42
3.8.2. Induction of CRE-controlled Luciferase Activity by TSH and EGF	43
3.9. Expression of Conventional and Novel PKC Isoforms in HTC-TSHr Cells	44
4. DISCUSSION	46
5. SUMMARY	61
Zusammenfassung in deutscher Sprache	62
6. LIST OF REFERENCES	65
Erklärung	83
CURRICULUM VITAE	84
